Installation Instructions For Small Grounding Kit 99411399

Panel Screws Enclosed

- 1. Insert the 10-32x5/8 screw through the hole in the panel as shown.
- 2. Secure screw with keps nut. The keps nuts must penetrate into the paint to ensure electrical continuity.
- 3. Attach the ground wire and secure with 10-32 hex nut as shown.
- Install the lockwasher under one of the screws securing the panel to ensure grounding between the panel and the enclosure. Recommended torque for grounding washer not to exceed 30 in-lbs.
- 5. Attach included grounding label adjacent to the bolt as shown.
