

Taskrig - Project & Portfolio Management

People management & Collaboration top the list of issues that organizations globally are facing when delivering a Project. Resources are prime to delivery of any kind of resource intensive projects. Further, the right kind of skill sets is required to deliver a project with Quality.

Hunting for the right kind of resource, and aligning one with a Project has become an intrinsic part of Project Management, more so when Profit Margins are reducing. In the same way strict deadlines and cut-to-fit requirements mean the project needs to be delivered with immense accuracy before time. Loss of time in any form especially due to lack of communication or mismanagement has forced organizations to look for Collaboration tools that aide in just in time deliveries.

Not just Projects and Tasks - A whole lot of Work properly managed!

Workrig provides a balanced solution of sorts, with an integrated package that not only manages projects but adds up as a Hiring partner, a Document repository and an Invoicing software in a free flowing application. Manage projects in Agile, lookup Whiteboards and check for Issue status, communicate & collaborate to deliver, on time. Host of tools to check for development of projects, configure a white board in multiple fashions, configure alerts and notifications, lookup Analytics essential for a quick review.

Project & Portfolio Management

Manage your tasks, documents, milestones; business case; all in one place. As work deploys projects to resources under **My Work**; using Whiteboard and Agile systems, you plan a project, check for resource availability & overload, assign tasks and roll out the project with ease. You would want them to have their specific view of the project. Un-complicate systems by using a single product, rather than excel, outlook, document sharing tools, charts etc.

Timesheet Management

A comprehensive timesheet management module, with its own set of configurations, allowing for flexibility for either adding hours for a certain task- daily at the end of the day, or use the Clock-in (Start) and Clock-out (End) to update the system on a real time basis. The timesheet is periodically sent for approval to the TL/ PO for approval before being converted into approved timesheet for approval of the customer. It is integrated with billing & receipts.

Billing & Receipts

A highly configurable Billing, Tax and Receipts module allows for a Global implementation of Invoices, set across multiple Legal Entities in various countries. A wide variety of Invoice types are available that can be used inclusive of milestone / fixed billing, prorate/ timesheet based billing & Adhoc-bills.

People Management

Add Resources, from a pool already added as people for the company. Workforce Management providing information about unused and used resources, Plan your Workforce based on your projects, generate new requirements for Hiring. Integrated Hiring Management takes care of the rest. People Analytics providing performance of people as resource, TL & P-O, with respect to Time and Money. Qualitative reviews by stake holders.

Hiring Management

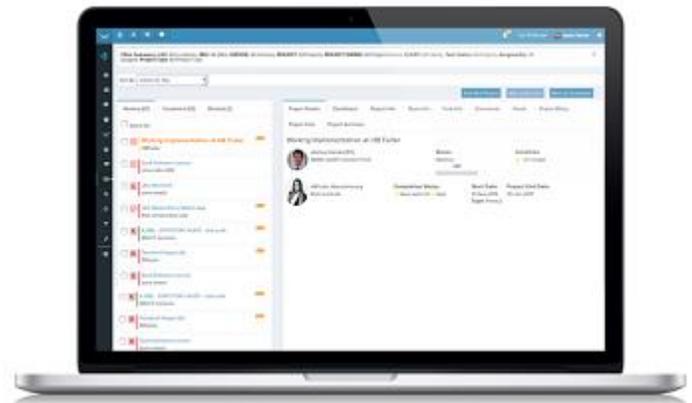

Integrated module, with People triggered by shortage of resources, or self triggered by the Project Owner. A comprehensive Hiring Management system, which allows you to manage & track the entire process of Hiring.

Document Management

Manage documents, both within and outside projects. Allows you to tag & save Files and Documents with Categories or Projects. Search documents saved and check Previews. Share Documents with people- Private, Public and Team. Documents integrated with Customer Login for Document sharing.

Analytics - Project, People and Portfolio

From Projects to People, Portfolio & Organizational Analytics, the system provides tons of analytics that answer the right questions. Projects are aligned with Project Managers, thereby providing performance analytics, intuitive Industrial Cost Benefit Analysis, with SBU filters if required. Portfolio of a certain group is analyzed holistically & at the same time business cases are built.
