Tender Text

GRP cable tray, pressed, with unperforated side beams and bottom, with moulded connector and with transverse reinforcements (5 mm) over the entire cable tray width in the bottom, mechanical strength acc. to IEC 61537, please order proportional fastening accessories separately, halogen-free.

Due to the transverse reinforcements, the cable tray is also approved for use with high-frequency cables acc. to UTE C15-900 (application class D, frequency 16 MHz).

An expansion distance of 8 mm must be taken into account. Due to the expansion of the material, the following must be observed during installation:

- The cable tray should not be screwed close to or at the joint.
- When screwing the cable tray onto the brackets, a through hole of Ø 9 mm for the FKM 6X20 E4 screws must always be made in the tray.

Article available in various resin mixtures.
