Tender Text

Turning lock, for subsequent or additional installation in cable tray covers, including galvanised mushroom head screw with slot FL 6X12-S DIN 603 and galvanised safety nut SMS 6 DIN EN ISO 10511.

Use outdoors, due to external influences such as wind loads, is only possible with an additional safety device (self-tapping screws, steel band, etc.). When fastening, ensure that a minimum distance of ≥ 50 mm to the cover start/end is maintained.

Furthermore, it must be ensured that the screw head slot is mounted flush with the fastening lug of the turnbuckle plate. This ensures that all twist-locks on the cover are properly closed (position of the screw head slot) at a later date. Please observe additional regulations for use in functional maintenance!
