Tender Text

GRP cover for cable tray, pressed, with moulded lug to reduce deflection at the cover joint, protection against ingress of dirt as well as increasing stability with the adjacent cover, halogen-free. The fastening can be made in the cable tray system K² with cover clamps DF ... E4, 2 pieces per metre (please order separately).

Due to external influences, e.g. wind loads, the number of cover clamps or cover fastenings must be increased. To ensure proper and stable installation, make sure that the joints of the covers have a minimum distance of 8 mm and are arranged offset to the joint of the cable trays.

Article available in various resin mixtures.
Used for : GRP cable trays KKL...
