

Knock-On Conversion Latch

HOLDING FRAME LATCHES

- Zinc-plated to withstand harsh environments
- Latches available for a variety of filters and filter combinations
- Easy conversion of other manufacturers' holding frames to accept AAF filters
- For use with AAF aluminized and stainless steel frames

Flexible Design

AAF's Knock-On Conversion Latches allow installation of all combinations of AAF filters in our Stainless and Aluminized Steel UHF's, or in other manufacturers' filter holding frames. Each latch is annealed to music wire specifications after forming, and commercially zinc-plated to provide years of service under varying environmental conditions. These latches are specifically designed for upstream or downstream servicing. They are replaceable and easy to use, requiring only a simple twisting motion to release the filter. Double latches allow prefilters to be changed without disturbing the final filter.

Latches for specific use with aluminized or stainless steel frames in high temperature applications are available.
