

ACCURATE
LOCK & HARDWARE
AMERICAN CRAFTED SINCE 1972

9168SEC | Confinement Room Lock

Accurate's 9168SEC ligature resistant & vandal resistant confinement room lock is designed with a concealed second cylinder. This 'backup' cylinder, is for use when the standard cylinder has been tampered with and no longer usable.

OPERATION

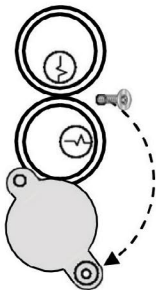

Loosen security tamper proof screw and swing cover to expose backup cylinder. Key retracts latch temporarily. Ligature resistant flush pull allows door control. Auxiliary latch deadlocks latchbolt.

9168SEC | Confinement Room Lock

Normal Use

Emergency Use

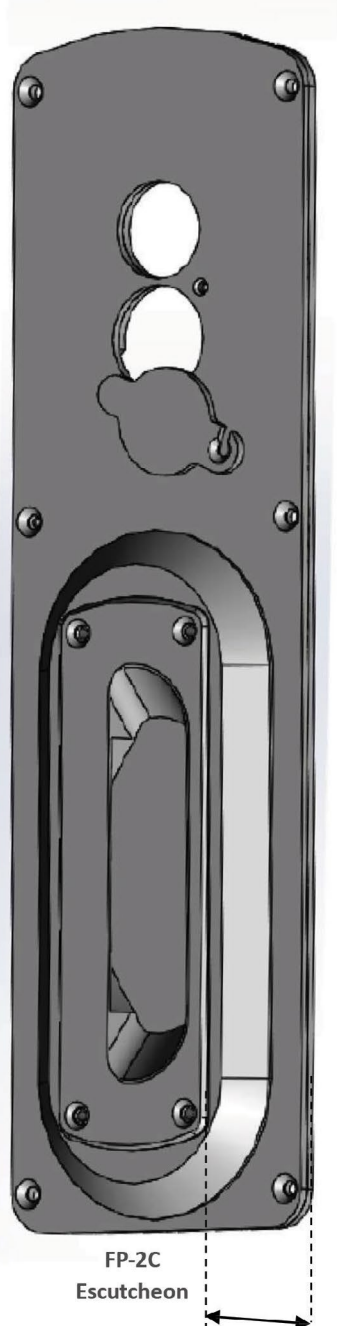

Emergency Cylinder Orientation:

Horizontal with plug opposite latch edge.

Emergency Cylinder Cover Screw:

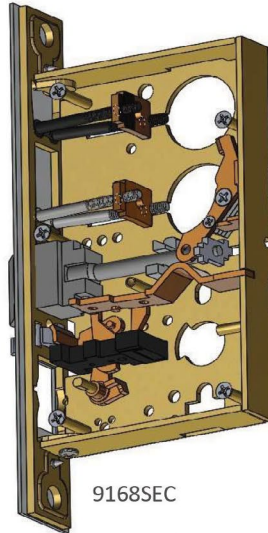

Specify type security screw required. It is factory installed to allow partial release, preventing loss onsite.
