

LR-RFID

Ligature Resistant Card Reader Cover

Safety housing for access control RFID devices. Designed for use in high security areas in healthcare facilities, correctional institutions, schools or anywhere that ligature points could be a concern.

Designed to be furnished with industry standard HID Signo 40 or 40K readers. (Please specify when ordering). Contact us if you require a custom furnished solution.

Height: 7"

Width: 5 3/4"

Projection: 1"

Robust Construction: Made from high-quality stainless steel and tough impact-resistant molded polycarbonate, our reader covers provide long-lasting reliability and meet UL94 standards for fire safety..

Ligature Resistant Design: Prioritizing safety, our RFID card reader covers are designed to prevent accidental or intentional self harm, minimizing the risk of ligatures in any environment.

Controlled Access: Manage and control entry to rooms and areas easily. The LR-RFID ensures only authorized personnel gain access, its design prevents tampering and unauthorized entry, enhancing overall safety & security.

Sealed Design for Outdoor Use: With its sealed design, our card reader cover is suitable for wet and outdoor locations.

Easy Integration: Seamlessly integrate our card reader cover into your existing access control system, ensuring a smooth and efficient operation.

Versatile Applications: Suitable for various environments, including healthcare facilities, correctional institutions, and other high-security areas where safety is paramount.
