1129 Thumb Turn Disc

FUNCTIONAL CYLINDER HOLE INSERT

1129 Thumb Turn Disc

- Functional cylinder hole insert that is intended to increase the gap between the lever/knob to thumb turn.
- Designed to use when the sectional trim roses are too large and the gap from the lever/knob to thumb turn is too small.
- Operates differently than a standard thumb turn hub
 - (E.g. The standard thumb turn hub rotates 90 degrees, the disc insert must rotate 180 degrees for proper operation.)
- 3-3/8" spacing when using the 9000 / 9100, 8500 / 8600, 8700 / 8800 Series locks.
- Traditionally used with old Yale style deadbolts (336, 338).
- When ordering, please specify lock being used: 1129-9100/8800, 1129-8500, 1129-300.
