

Mortise lock with Security Monitoring (SM).

## SM - SECURITY MONITORING

A combination of AM and LB, the SM switches monitors the locked/unlocked status and the status of the auxiliary latch. Lockset must be locked with the main latch extended and the auxiliary latch depressed to get a secure signal. If any of the conditions are not met, lockset goes into an unsecure mode.

## ELECTRICAL SPECIFICATIONS

Two SPDT Mechanical Switches Mounted in Series Inside the Lockset

VOLTAGE	CURRENT
125 VAC	1 AMP
30 VDC	0.5 AMP

NOTE: Mainly used as a dry contact monitoring switch
