Ligature Resistant Crescent Handle with Cylinder and RFID Reader Housing

DESIGNED FOR USE IN:

Healthcare facilities, correctional institutions, and schools: anywhere where ligature resistant and/or anti-tampering design is needed.

Accommodation available for a variety of readers upon request. Contact us for more info.

PROBLEMS SOLVED:

- Ease of access to card reader
(no need to plan for extra space to place the reader on the wall)
- Eliminating the standard reader cover results in less ligature opportunities *(especially when readers are near patient areas)*
- Card reader tampering
