LR-SW LIGATURE RESISTANT SWINGING DOOR SYSTEM

TO PROVIDE SAFETY + PRIVACY FOR PATIENT BATHROOMS

LR-SW SWINGING DOOR SYSTEM

Designed to be a heavy-duty, cost-effective solution that provides increased safety and privacy in bathroom and shower applications. This patented swinging door solution can hold over 300lbs of weight and operates without springs, which removes possible ligature points and allows the door to swing in both directions. It can open to 90° in either direction, stay open by design, and when moved to approximately 60° will self-close centered to the opening.

LR-SW DOOR OPTIONS

- The LR-SW system is ideal for en suite bathroom doors and can be customized for shower applications.
- To designate a shower door application, simply add “.SH” to the part number (e.g. LR-SW.36.FP125.SH). This ensures the system includes anodized aluminum, hard-coated components, and a stainless-steel rod for durability.
- Optional seals available for shower door applications (see LR-SW-SH-G for details)
- For proper installation, specify the hinge surface to ensure the correct fasteners are provided (e.g., TAPCON screws for concrete installations).

LR-SW DOOR OPTIONS

FROSTED POLYCARBONATE

(Standard)

Offered in 1/8" or 3/8"
thick panels (1/8"
recommended)

Polycarbonate panel also
available in white (PW)
and black (PB)

PLASTIC

1/2" Thick

Available options:

Teak

Mahogany

Maple

Kona

LR-SW DOOR OPTIONS

HDPE PLASTIC COLOR OPTIONS

½" Thick
