### Rabbeted Kits

STANDARD + TRADITIONAL STYLES FOR RABBETED DOOR JAMBS

## STANDARD RABBETED KIT

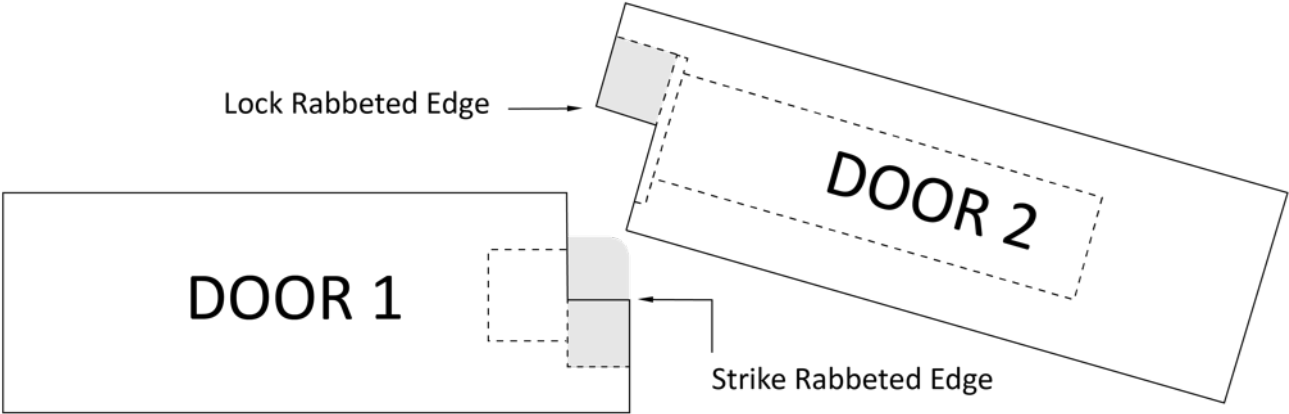

Shown with Accurate's 9100 Series lock, the **Standard Rabbeted Kit** is designed for door openings that feature a recess or groove cut into the wood, eliminating any gaps when doors are closed providing maximum privacy.

Shown with Thom Filicia for Accurate  
Henderson Knob and Rectangle  
Escutcheon

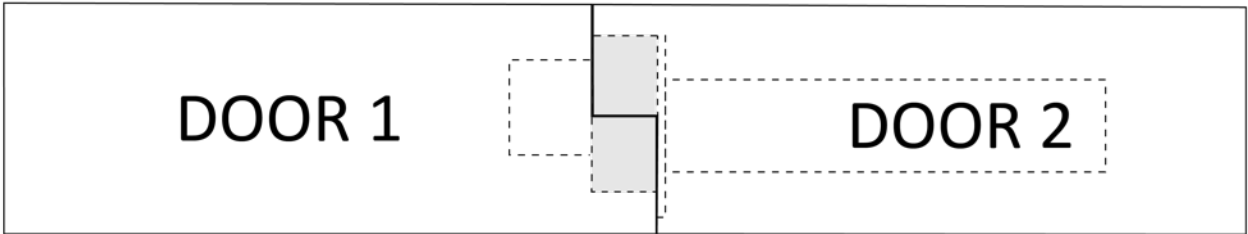

# RABBETED DOORS

Rabbeted kits were traditionally used before weather stripping became popular on exterior doors. Now they are commonly used to create seamless openings on interior pairs of doors. Each door is cut with a recess (half of the edge) so that high edge of the door meets the low edge of the other door creating a seamless closure that enhances privacy and eliminates gaps.
