Notes on Expiring Markets

- Non-cash markets (e.g. USOIL.JUN7) have a fixed expiry date, as detailed, above.
- Any positions remaining at contract expiry will be closed on the last trading day as per the instructions, above.
- ADS will endeavour to contact any client with an open position prior to the contract's expiration to let them know the product will soon expire.
- Clients do, however, have ability to roll their position from the front month into the next month.
- ADS will make available for trading the following contract month on the platform one week before the front month expires (except oils which will run two months simultaneously).
- Clients may contact ADS and, at any point during trading hours, request to roll their position over the phone. Clients will be closed at the prevailing bid/offer of the front and put in at the corresponding next month bid/offer, thereby removing the execution risk involved in manually trading the two contracts.
- Clients must realise their profit/loss on the front month position when rolling.
- If a client has insufficient funds to roll their position, then they must deposit funds in order to do the roll.
- Please note that times displayed by our MT4 servers are UK time + 2 hours.
- "Regular Spread" times, "Pre Open Spreads" times, "Post Market Spreads" times, and "Overnight Spread" times stated above may vary without notice due to, but not exclusively, daylight saving time, market disruption events or any event outside of ADS' control.

CFDs and Spread bets are complex instruments and come with a high risk of losing money rapidly due to leverage. You should consider whether you understand how CFDs work and whether you can afford to take the high risk of losing your money.

Professional clients can incur losses that exceed deposits.
