5 Reasons Adults 50+ Should Consider Vision Insurance

Your eyes are the window to the world – take care of them

by VSP Individual Vision Plans (Full Content) | Comments: 3

Here's What to Expect With a Vision Plan

1. A Preventive Complimentary Eye Exam – It is important to have an annual eye exam for optimal eye and overall health. In fact, the average person is more likely to see a doctor for a toothache than a vision exam. A comprehensive eye exam performed by an eye doctor is a way to identify potential eye problems and treat them if necessary. The eye doctor will check vision and eye health, and may also test for conditions such as diabetes, high blood pressure, and other underlying health issues.

2. Lower Rates for Sudden Eye Care Needed Beyond the Regular Exam – If you need glasses or contact lenses, your vision plan may offer you significant savings on frames and lenses. Plans may include access to member discounts, plus an additional 20% off designer frames. The savings add up.

3. A High Level of Care From a Trusted Network of Top Eye Care Professionals – It’s not easy to find a doctor you can trust. Our vision plan allows you to determine the best vision plan that meets your needs and provides complete care. Once you’ve chosen your vision plan, you’ll have access to a network of top doctors who will provide you with quality care.

4. Frames and Lenses at the Right Price – You won’t have to worry about finding the right frames and lenses at an affordable price. Affordable lens plans provide frame allowances for glasses or contact lenses.

5. Enhancements That Complement Your Complimentary Eye Exam – Think of it as a custom vision enhancement that can include vision care for your unique needs. These include services such as malignant melanoma screening and cataract consultations. If you have a vision plan that provides additional enhancements, you’ll receive more vision services that fit the enhancements you need.

No vision coverage? Whether you’re self-employed, a part-time, retired or aspiring to retire and your employee coverage will be discontinued, VSP has your covered with Individual Vision Plans that start as low as $9 per month. Think plan in your area.
