Find others to visit when you can’t

When you’re too busy, sending a note or dealing with your loved one’s medical needs can be overwhelming. Help them feel less alone by connecting them with friends, family, and fellow seniors. Make it easy for them to reach out by setting up regular calls or visits.

Help manage finances from a distance

Managing money is easier when you can see and control things. Use Alexa Together to keep track of bills, expenses, and investments. You can also set up paid subscriptions for your loved one, such as online services or newsletters.

Utilize smart home technology

With Alexa Together, you can keep track of your loved one’s movements and activities from anywhere. Use smart home automation to turn on lights, play music, or close the garage door. You can also set up reminders for important tasks or events.
