

Angled quick air vent

benefits

- slim design for low heat loss
- ideal for automatic venting of radiators or if space is limited
- with aqua stop

Application

For automatic venting of radiators. Suitable for up to 12 bar/110 °C for water and water/glycol mixtures with up to 50 % glycol.

Description

Automatic quick air vent with aqua stop. The vent cap does not have to be removed during operation of the quick air vent, not even for initial filling or servicing.
