

Inner lining AR-S

Part no. 43888.019

Inner lining for rainwater harvesting

benefits

- Customised inner linings made of plastic for cylindrical tanks and rectangular tanks
- for modern, hygienic rainwater storage tanks
- ideal for decommissioned fuel oil storage tanks to be converted to rainwater storage tank
- please enquire for inner linings for spherical tanks, cisterns, cesspits and other containers
- suitable plastic manhole cover Ø 500 mm for rainwater harvesting optionally available

Application

When old heating oil storage tanks are taken out of service, for example due to corrosion, or if the heating system is converted to other types of fuel, the existing tanks can be used to collect rainwater. For integration into a rainwater harvesting system, the tank is cleaned and then fitted with a special inner lining suitable for water. The old, standardised manhole cover (Ø 500 mm) is replaced with a plastic cover specially designed for rainwater harvesting.

Description

Plastic inner linings for use as rainwater tank. For hygienic sealing of cylindrical or rectangular tanks to be used in rainwater harvesting systems. Please enquire for inner linings for spherical tanks, cisterns, cesspits and other containers. It is advisable to install a vacuum type leak detector to monitor the rainwater storage tank for tightness, but this is not mandatory in the case of cylindrical tanks.
