

Isolation amplifier TV 22 GL

Part no. 53701

Isolation amplifier

Application

The TV 22 GL isolation amplifier is used for galvanic isolation and amplification of DC signals (mA).

Description

Input and output are galvanically isolated with a high degree of isolation. The integrated high-efficiency electronic power supply unit helps to avoid overheating and allows for high output loads. The extremely narrow design results in a high packing factor.

Technical Specifications

Housing

DIN rail housing
W x H x D: 18 x 78 x 103 mm

Supply voltage

AC/DC 20 – 253 V

Input

0–20 mA oder 4–20 mA

Output

0–20 mA oder 4–20 mA
1:1 to input signal

Output load

max. 400 Ohm

Versions

Part no.

Isolation amplifier
