

Isolation amplifier

Application

The TV 22 GL isolation amplifier is used for galvanic isolation and amplification of DC signals (mA).

Description

Input and output are galvanically isolated with a high degree of isolation. The integrated high-efficiency electronic power supply unit helps to avoid overheating and allows for high output loads. The extremely narrow design results in a high packing factor.

Technical Specifications

Housing

DIN rail housing

W x H x D: 18 x 78 x 103 mm

Supply voltage

AC/DC 20 – 253 V

Versions

Part no.

Isolation amplifier
TV 22 GL

53701
