

Pressure measuring instrument set for tightness test

benefits

- ready-to-use set for all tightness tests, strength tests and final tests in a robust case
- digital measurement logs with customer data and charts
- powerful lithium-ion battery for up to 38 hours of operation
- Bluetooth® Smart interface: Power-saving data transmission to AFRISO CAPBs® or to the free EuroSoft mobile app

Application

For pressure tests as per SVGW Directive W3/E3. Can be used for tightness tests with air (150 mbar), final test (operating pressure) as well as tightness and strength test with drinking water (3 bar/15 bar) in drinking water pipes. Suitable for tightness tests (150 mbar) and load tests (1 bar) on gas pipes and for checking the connection and flow pressure as well as the pressure loss. Ideal for acceptance tests of drinking water installations, solar or heating system pipes, underfloor heating systems, liquid gas pipes and oil pipes.
