

pressure gauge shut-off valve

Part no. 63109

pressure gauge shut-off valves

Application

Shut-off or reducing element between pipe and pressure gauge. Stop valves with test port allow you to connect both pressure gauges and testers to the measuring line. Suitable for liquids, gases and vapour.

Technical Specifications

Version

DIN 16271 with male test port M 20 x 1.5
Type B loose female coupling x male connector and shaft for instrument bracket

Connection

see ordering table

Nominal pressure

PN 400

Housing

Stainless steel 316 Ti

Operating temperature range

Stainless steel 316 Ti
-20/+200 °C
