

pressure gauge shut-off valve

Part no. 63194
pressure gauge shut-off valves

Application

Shut-off or reducing element between pipe and pressure gauge. Stop valves with test port allow you to connect both pressure gauges and testers to the measuring line. Suitable for liquids, gases and vapour.

Technical Specifications

Version
DIN 16270 without test port
Type A female/female connection x male

Operating temperature range
Stainless steel 316 Ti

Connection
see ordering table

Nominal pressure
PN 100

Housing
Stainless steel 316 Ti
