

Test set for pressure test

benefits

- extremely robust design
- three adapters for limited space conditions
- with zero correction ring
- ready-to-use kit in sturdy plastic case

Application

For pressure tests of expansion vessels, tanks and tyres.

Description

Robust, very accurate pressure gauge in aluminium housing with ring for zero correction. Measuring range 0/4 bar. With three adapters for car valves which are also used for expansion vessels. The three adapters (straight, 45°, 90°) allow for usage even if space is limited. Plastic case with insert included in scope of delivery.
