

# Bioprotek Rosso

Potassium salts solution (K 10)

## COMPOSITION

Potassium oxide (K <sub>2</sub> O) water soluble	10%
Manganese oxide (Mn) water soluble	1.4%

**Appearance**  
Liquid

**Application**  
Foliar

**Packaging**  
5 - 10 - 25 Kg

## DESCRIPTION

Bioprotek Rosso is a Potassium silicate and Manganese based product in a stable formulation, suitable for Integrated Agriculture on all tree and floricultural crops, from the vegetative awakening up to the harvest.

As a source of Potassium and Manganese, this product is suited for foliar treatments; thanks to its polyvalent matrix, it guarantees an harmonious and healthy development of the vegetation.

Bioprotek Rosso performs useful growth functions, ensuring high and balanced intake of K and Mn, restores plant's health state thanks to his high alkaline Ph and it allows an effective protection of the plant, inhibiting most pathogenic fungal attacks.

Thanks to its precious cytotropic characteristic, it can be quickly activated both outside and inside plant tissues, ensuring maximum efficiency on development and flowering.

It helps to control various pests, enhancing plant defense mechanisms, thanks also to the organic matter oxidation process.

Bioprotek Rosso performs an interesting action against Powdery Mildew, on Cucurbits and Solanaceae, controlling other pathogens without developing resistant strains.

Against Powdery Mildew we recommend to alternate Sulphur treatments.

## DOSES AND METHOD OF USE

Crops	Foliar (Kg/ha)
Tree crops	3 - 7 Kg/ha
Industrial crops	3 - 7 Kg/ha
Horticultural crops	3 - 7 Kg/ha
Floriculture	3 - 7 Kg/ha
Lawn turf and golf courses	3 - 7 Kg/ha
