

Aminofer

Mixture of Organic Nitrogen fertilizers with Iron

Organik

COMPOSITION

Organic Nitrogen (N) totally soluble in water	5%
Total Iron (Fe)	1%
Organic Carbon (C) of biological origin	20%

Appearance
Liquid

Application
Foliar / Fertigation

Packaging
5 - 25 Kg

DESCRIPTION

Aminofer is an Organic Nitrogen totally water-soluble fertilizer, obtained by hydrolysis of organic substances of vegetable origin with iron addition.

Composed of oligopeptides and free amino acids, yeasts, vitamins, etc. it represents an immediate Nitrogenous reserve, directly used by the plant for proteins, enzymes, plant growth regulators and sugars synthesis.

Aminofer increases yields, fruit set, fruit size, organoleptic qualities and shelf life of fruits; on plants debilitated by stress (frost, hail, weeding, root asphyxia)

their vegetative recovery is favoured.

The valuable presence of Iron in a complex form, carries iron ready to be absorbed by roots for a physiological need and for the resolution of Iron deficit.

Aminofer is useful to solve light chlorosis in soils with an alkaline pH.

Product signed up to Fertilizer Register for Organic farming: n° **0017177/16**

DOSES AND METHOD OF USE

Crops	Foliar	Fertigation
Tree crops	250 - 350 g/hl	30 - 60 Kg/ha
Industrial crops	250 - 350 g/hl	30 - 60 Kg/ha
Horticultural crops	250 - 350 g/hl	30 - 60 Kg/ha
Floriculture	250 - 350 g/hl	30 - 60 Kg/ha
Lawn turf and golf courses	250 - 350 g/hl	30 - 60 Kg/ha

Associated to insecticidal and herbicidal treatments (1-2 kg/ha)
