

Huminal Combi

Humic extracts from leonardite

COMPOSITION

Organic matter	11%
Organic matter on dry substance	62,5%
Organic matter humified as percentage	62,5%
Organic Nitrogen on dry matter	0.6%

C/N Ratio: 52

Extractive: Potassium hydroxide

 **Appearance**
Liquid

 **Application**
Foliar / Radical

 **Packaging**
1 - 5 - 20 - 1250 Kg

DESCRIPTION

Humic and Fulvic acids are organic substances that, thanks to their nature and structure, are able to complex a high number of nutrients, helping their absorption and translocation into the plant tissues, promoting cells division and differentiation.

Huminal combi, used for **Radical** applications:

- improves the physical and chemical characteristics of the soil;
- increases the development of the root system on crops;

- increases and improves the nutrients uptake in the soil (complexing power);
- stimulates microbial flora.

Huminal combi, used for **Foliar** applications:

- complex and carries active ingredients and nutrients in which it's associated;
- stimulates metabolic processes;
- improves plant resistance.

DOSES AND METHOD OF USE

Crops	Foliar	Fertigation
Tree crops	1 - 3 Kg/ha	40 - 60 Kg/ha
Industrial crops	1 - 3 Kg/ha	40 - 60 Kg/ha
Horticultural crops	1 - 3 Kg/ha	40 - 60 Kg/ha
Floriculture	1 - 3 Kg/ha	40 - 60 Kg/ha
Lawn turf and golf courses	1 - 3 Kg/ha	40 - 60 Kg/ha
