

OrgaNeem 450

Organic Nitrogen Fertilizer

COMPOSITION

Organic Nitrogen (N)	4,5%
Organic carbon (C) of biological origin	26%
Organic matter	47%

 **Appearance**
Pellet

 **Application**
Radical

 **Packaging**
20 Kg

DESCRIPTION

OrgaNeem 450 is an exclusively vegetal organic formulation, obtained by a cold extraction process of oil from Neem tree seeds, without adding chemicals.

Organeem 450 looks like a fertilizer in dark pellets, with a smooth and uniform surface, with a characteristic strong smell.

Organeem 450 is a slow-release, nutritive, protective and anti-stress product rich in organic Nitrogen 4.5%, Phosphorus 2%, Potassium 2%, Mesoelements (Calcium, Magnesium, Sulfur), Trace elements and other organic

substances and above all limonoids (Nimbin 500 ppm and Salannin 2000 ppm) and residues of Azadirachtin (1500 ppm), a suitable combination, ready to be absorbed by roots with a high phytoprotective power.

These components enhance cellular metabolism, resistance to parasites and radical pathogens and positively influence the activity of beneficial microorganisms present in the rhizosphere.

It's an ideal biological nematocide, it is also a natural pests repellent for many important crops.

DOSES AND METHOD OF USE

Warning: for a complete and correct crop fertilization, we suggest to use OrgaNeem 450 after or during the somministration of phosphate fertilizers.

Crops	Application	
	Placement	Localized
