

Organik 600

Organik

Organic Nitrogen Fertilizer - Mustard cake

COMPOSITION

Organic Nitrogen (N)

6%

Raw materials: Mustard cake

Appearance
Pellet

Application
Radical

Packaging
20 Kg

DESCRIPTION

Organik 600 is an exclusively vegetal organic formulation, obtained by a cold extraction process of oil from Mustard plant (Brassica nigra), a plant belonging to Brassicaceae (correggi in ita) family, without adding chemicals.

Organik 600 looks like a fertilizer in dark green pellets, with a smooth and non uniform surface, with a characteristic strong smell.

Organik 600 is a slow-release, nutritive, protective and anti-stress product rich in organic Nitrogen 6%, Phosphorus 2%, Potassium 2%, Mesoelements (Calcium,

Magnesium, Sulfur), Trace elements, Vitamins B, C, E, K proteins, mineral salts and alkaloids, mainly: the glucoside synapsin, sinigrin and allyl isothiocyanate; a suitable combination, ready to be absorbed by roots with a high phytoprotective power.

These components enhance cellular metabolism, resistance to parasites and radical pathogens and positively influence the activity of beneficial microorganisms present in the rhizosphere.

It's an ideal biological nematocide, it is also a natural pests repellent for many important crops.

DOSES AND METHOD OF USE

Crops	Radical
Tree crops	800 - 1200 Kg/ha
Industrial crops	800 - 1200 Kg/ha
Horticultural crops	800 - 1200 Kg/ha
Floriculture	800 - 1200 Kg/ha
Lawns and golf courses	800 - 1200 Kg/ha
