

Protein Silver 6,5 N

Fluid fleshing in suspension

COMPOSITION

Organic Nitrogen (N)	6,5%
Organic Nitrogen (N) soluble in water	6,5%
Organic carbon (C) of biological origin	23,5%

Raw materials: hydrolyzed proteins
Not applicable to edible parts of the crop

Organik

 Appearance
Liquid

 Application
Foliar/Fertigation

 Packaging
5 - 30 - 1250 Kg

DESCRIPTION

Protein Silver is an organic fertilizer consisting of enzymatic hydrolyzed protein of animal origin, rich in amino acids, peptides and peptones with low and medium molecular weight.

The product is particularly active, both used by leaves and roots, in all phenological phases of the crops, for its important biostimulant action.

Thanks to the carrying properties, we suggest to use it with NPK elements or trace elements, because it favours the adsorption, allowing lower rates of fertilizers reducing costs.

Protein Silver is used for foliar applications and fertigations every 10-15 days, from the sprouting on tree crops; after transplanting on horticultural and flower crops; after emergence on seedlings.

Thanks to wetting, tackifying, anti-evaporating and carrying properties, Protein Silver reduces dripping losses, so it allows a lower rate use of insecticides, fungicides, herbicides if mixed together.

Product signed up to Fertilizer Register for Organic farming: n° 10746/15

DOSES AND METHOD OF USE

Crops	Foliar	Fertigation
Tree crops	3 - 5 Kg/ha	25 - 75 Kg/ha
Industrial crops	3 - 5 Kg/ha	25 - 75 Kg/ha
Horticultural crops	3 - 5 Kg/ha	25 - 75 Kg/ha
Flower crops	3 - 5 Kg/ha	25 - 75 Kg/ha
Lawns and golf courses	3 - 5 Kg/ha	25 - 75 Kg/ha
