

Radi-Cal

Calcium complex (ammonium lignosulfonate)

COMPOSITION

Total calcium oxide (CaO)	15%
Calcium oxide (CaO) in the form of a complex	12%
Complexing agent: ammonium lignosulphonate	

Organik

Appearance
Liquid

Application
Foliar/Radical

Packaging
25 Kg

DESCRIPTION

Radi-Cal is a liquid fertilizer with a high content of Calcium complexed with ammonium lignosulphonates, resulting from wood cellulose extraction process. Unlike other chelating agents, Lignosulfonates don't destroy the structure of cell walls during absorption.

Radi-Cal is not influenced by the chemical characteristics of water and soil and its stability is maximum at both acidic and alkaline pH. The product is effective in the treatment and prevention of many plant diseases due to calcium deficiency.

- On stone fruit from petals falling to ripening to increase consistency, shelf life and sugar content of the fruit.
- In viticulture against rachis lesions, it also increases the sugar content and the consistency of the berries.
- In strawberry growing, during the fruit growing phase, it improves fruit consistency.
- In lettuce during growth, to prevent and control necrosis and rots.
- In celery to prevent and control the black heart.

DOSES AND METHOD OF USE

Crops	Foliar	Radical
Tree crops	2 - 4 Kg/ha	20 - 80 Kg/ha
Industrial crops	2 - 4 Kg/ha	20 - 80 Kg/ha
Horticultural crops	2 - 4 Kg/ha	20 - 80 Kg/ha
Flower crops	2 - 4 Kg/ha	20 - 80 Kg/ha
Lawns and golf courses	2 - 4 Kg/ha	20 - 80 Kg/ha
