

COMPOSITION:

Crude Protein	min	g/kg	240
Crude Protein ex NPN	max	%	55.1
Urea	max	g/kg	30
Moisture	max	g/kg	120
Crude Fibre	max	g/kg	100
Calcium	min/max	g/kg	5 / 15
Phosphorus	min	g/kg	3
Magnesium		g/kg	2.5
Sulphur		g/kg	9
Potassium		g/kg	14
Copper		mg/kg	40
Manganese		mg/kg	500
Zinc		mg/kg	500
Cobalt		mg/kg	1
Iodine		mg/kg	11
Selenium		mg/kg	4.5
Vitamin A		IU/kg	12 000
ME Ruminant (Calculated)		MJ/kg	9

Feeding instruction: Intake per day

Sheep/Goat 300 - 420 g

Molatek Lamb and Ewe Lick is a high-quality production lick for sheep and goats that uses high-quality bypass protein to ensure optimum future production potential of the flock.

ADVANTAGES:

- Due to small differences in the nutritional requirements of late-pregnant and early-lactating ewes, only one supplement is needed at different intake levels.
- Decreases pregnancy disease and the incidence of abortions.
- Enhances foetus and udder development in late pregnancy.

- Normal onset of lactation with enough colostrum for twin lambs.
- Increases milk production during lactation.
- Ensures vigorous, healthy lambs are born.
- Fewer discarded lambs.
- Ewes have a lower weight loss which increases conception and lambing %.
- Optimal lamb growth and weaning weights.
- Supply as a production supplement for young ewes and rams after weaning to improve growth.
- Optimal development of lamb's reproduction potential.
- Sufficient wool follicle development in lambs for a lifetime of optimal wool production.
- Improves wool production and the tensile strength.
- Highly palatable.
- The molasses binds the lick thus avoiding loss caused by wind.
- High in quality bypass protein.
