Feeding instruction: Intake per day

Sheep/Goat 350 - 450 g

Cattle 1 000 - 2 000 g

- Green summer veld and harvested maize fields will give the best results with backgrounding.
- **Molatek Background 18** must be mixed with grain when used on winter veld. **Molatek Background 18**, is an excellent, high-quality protein and high-energy product suitable for the rearing and finishing of young animals, as well as for the backgrounding of feedlot calves on good quality green pastures. This product can be used with great success for, amongst others, lactating cows, the rearing of heifers, first-calf heifers and phase D bulls. **Molatek Background 18** contains an ionophore to enhance feed conversion and growth.

ADVANTAGES:

- Ensures the correct preparation of calves and easy adaptation in the feedlot.
- Is an excellent high-quality protein and energy product that is suitable for the growing out and backgrounding of calves on pastures and maize residue.
- Contains a growth promoter that improves pasture digestibility, energy availability, growth and efficiency of feed utilisation.
