

Breker 12

- Complete finisher feed for all livestock
- Cost-effective
- Can be used as a drought feed
- High roughage levels help to prevent rumen disturbances
- Contains no urea, thus it is suitable for cattle, sheep and game
- Contains high-grade Lucerne
- Contains a vitamin and mineral premixture
- Breker 12 only contains products and materials which adhere to EU requirements and is suitable for use in Namibia

Recommended intake

- Breker 12 can be fed during a drought with no restrictions, after an adaptation period of seven days
- As supplement on natural grazing, 1 – 1.5% of body weight can be fed, and on poor pastures, 2.5 – 3% of body weight

Composition

		Minimum	Maximum
Protein	g/kg	120	
Protein ex NPN	%		12.4
Moisture	g/kg		120
Phosphorous	g/kg	2	
Calcium	g/kg		15
Fat	g/kg	25	70

Fibre	g/kg	110	200
Urea	g/kg		0

Warning: This feed contains NPN (ammonium sulphate and ammonium chloride) and must be fed strictly according to the instructions. Vitamin activity decreases with time. Consult the manufacturer or a nutritionist. Supply additional roughage during the first week of feeding for adaptation.
