

Cattle Mix 4:1:5

- Protein and mineral supplement in concentrate form and should thus be mixed
- Ideal for sandy areas
- Especially suitable for areas where too high lick intake is prevalent, and for animals with high protein and phosphate needs
- The Ca: P-ratio is 1:1 for better phosphate absorption
- Add urea, salt, and energy to mix own management, cow-and-calf, and finishing lick
- Contains no urea

Recommended intake

Raw materials (kg)	Cattle lick 40	Production Lick
Cattle Mix 4:1:5	200 kg (4 bags)	200 kg (4 bags)
Urea	50 kg (1 bag)	50 kg (1 bag)
Salt	250 kg (5 bags)	250 kg (5 bags)
Maize Meal		750 kg (15 bags)
Total Mix	500 kg (10 bags)	1 250 kg (25 bags)
Specifications (g/kg)	Min Max	Min Max
Protein	400 Max	200 Max
Protein ex NPN	Min 95	Min 75
Moisture	Min 120	Min 120

Calcium	20 40	9 16
