

Dry Veld Concentrate

- Protein and mineral lick concentrate and must thus be mixed
- Tasty and easily mixable
- Especially suitable in areas with high phosphate requirements
- Suitable for cattle and sheep
- Contains a vitamin and mineral premixture
- Can be combined with camel tree pods, prosopis tree pods, maize meal, and maize germ (Hominy chop)
- Mixing instructions are available, or contact a Feedmaster representative
- Can be combined to form a Grassveld lick, Beeslek 40, Cow-and-calf lick, Production lick, Veld finishing meal and a Pod-dry-veld lick
- Multi-purpose product
- Suitable for use in Namibia

Recommended intake

- For mixing instructions and recommended intakes, see tables below.

Composition

		Minimum	Maximum
Protein	g/kg	600	
Protein ex NPN	%		89
Urea	g/kg		150
Moisture	g/kg		120
Phosphorous	g/kg	30	
Calcium	g/kg		60

Warning:

This feed contains NPN and must be fed strictly according to the instructions. This concentrate is a supplement and not a complete feed, thus sufficient grazing and roughages should be available. Vitamin activity decreases with time. Consult the manufacturer or a nutritionist.
