

Kimtrafos 12 Grandé

Kimtrafos 12 Grandé is a phosphate-trace mineral concentrate, with all the trace minerals needed for optimal production and reproduction. Molasses is added during the manufacturing process to give the product a pleasant smell and taste to ensure sufficient intake.

Recommended use / application

This product is recommended for use in concentrates, compound feeds and mineral feeds or as a free choice supplement for cattle, sheep, goats, horses and game on phosphorous deficient grazing or good quality hay.
