

## Kynofos 21 Elite

Kynofos 21 is a granulated, pure phosphate and calcium source with low levels of undesirable elements and no added molasses or trace minerals.

Kynofos 21 is a high-quality feed grade, mono dicalcium phosphate (MDCP) containing approximately 3 parts phosphate from MCP (75 %) and one-part P from DCP (25 %). Kynofos 21 is a granulated, pure phosphate and calcium source with low levels of undesirable elements and no added molasses or trace minerals.

### Recommended Use / Application

The high bioavailability of KYNOFOS 21 makes the product an ideal calcium and phosphate source for all Species and the high phosphorous content allows for easy incorporation into diets. Kynofos 21 is recommended for use in concentrates, compound feeds, mineral feeds and free choice supplements for ruminants, monogastric animals and aquatic species.

## Kynofos 21 Fines

The high bioavailability of KYNOFOS 21 Fines makes the product an ideal calcium and phosphate source.

### Recommended Use / Application

The high bioavailability of KYNOFOS 21 Fines makes the product an ideal calcium and phosphate source.

The product is recommended for use in concentrates, compound feeds, mineral feeds and free choice supplements for ruminants, monogastric animals and aquatic species.
