

VOERMOL MOLOVITE

Class: Mineral and Energy Supplement for Ruminants

VOERMOL MOLOVITE is an energy, mineral supplement with 10 % crude protein and is NPN-free. **Molovite** is the ideal lick supplement for ruminants on fertilised cultivated pastures and protein rich bean pastures:

- is ready mixed and can be used as is;
- contains no NPN as the fertilised cultivated pastures supply sufficient NPN;
- supplies energy, natural protein, minerals and trace minerals which are normally the limiting nutrients in cultivated pastures and bean grazing;
- part of the trace minerals are supplied in organic form which is highly absorbable and promotes optimal reproduction and growth;
- contains high levels of vitamin D3 and E. Vitamin E in combination with selenium is a powerful anti-oxidant which strengthens the animal's immunity. Vitamin D3 helps with the absorption of phosphorus and calcium;
- contains zinc oxide to help prevent facial eczema in dairy heifers grazing fertilised planted pasture;
- has a low salt content and is molasses based, ensuring adequate intake;
- contains medicaments, which increase the effective energy usage on cultivated pastures;
- the medicaments also reduce the risk of ketosis, pregnancy toxemia and coccidiosis in animals.

COMPOSITION OF VOERMOL MOLOVITE

REG NO V7266 (Act 36/1947)
(g/kg)

(mg/kg)

Crude Protein	(min)	100	Manganese	240
Crude Fibre	(max)	100	Copper	60
Moisture	(max)	160	Cobalt	1
Calcium	(min/max)	8/12	Iron	175
Phosphorus	(min)	6	Iodine	5
Magnesium	(min)	6	Zinc	500
Sulphur	(min)	4	Selenium	1
			Vitamin D3 (IU/kg)	2 000
			Vitamin E (mg/kg)	50
			Energy est. (MJ ME/kg)	9
Contains medicaments				

Packaging – 50 kg

VOERMOL

USES OF VOERMOL MOLOVITE:

- can be used for cattle, sheep and goats and is especially suitable for young, growing and producing animals;
- is particularly effective as a supplement on cultivated, irrigated and dry land pastures such as Ryegrass, Fescue, grass clover mixtures, Smutsfinger grass, Blue Buffalo grass, 'Oulands' grass, Kikuyu, Star grass and green feeds such as oats, rye, triticale and wheat;
- can also be used on bean residues, e.g. soya and dry bean stalks and on bean pastures like cow peas and dolichos beans.

FEEDING INSTRUCTIONS

Feed in lick troughs with adequate feeding space.

RECOMMENDED INTAKE	(g/animal/day)
Cattle:	1 000 – 1 200
Sheep:	180 – 200

To fatten animals more rapidly on pastures, mix **Voermol Molovite** in equal quantities with grain meal and feed this mixture to cattle at 2 kg/animal/day and to sheep at 350 g/sheep/day.

NB. Contains medicaments and should therefore not be fed to horses.
