

EWE AND LAMB 13

Registration No: V 9903 Act 36 of 1947

Class: Ewe and Lamb Feed
Contains Urea @ 10 g/kg max

Form: Pellets

Description

- The ration can be used to maintain the ewe and lamb on veld grazing.
- A maximum of 22.1% of protein is derived from urea.

Benefits

- Highly palatable.
- The ideal diet to maintain pregnant or suckling ewes and stimulate lambs to eat.

Feeding Recommendations

- Animals should gradually be adapted to the feed.
- The quantity to be fed depends on the quality and quantity of roughage or grazing available.
- Roughage/grazing should be available at all times.

Composition

Nutrient	Quantity	Unit	Min/Max
*Protein	130	g/kg	Min
Urea	10	g/kg	Max
Fat	25	g/kg	Min
Fat	70	g/kg	Max
Fibre	150	g/kg	Max
Moisture	120	g/kg	Max
Calcium	15	g/kg	Max
Phosphorus	3	g/kg	Min

*22.1 % derived from urea

This product contains NPN sources - see NPN warning

NPN Warning

This feed may contain feed-grade urea / NPN sources and thus must be mixed and fed strictly according to recommendations:

1. Vinegar is an effective remedy against NPN (non-protein nitrogen) poisoning. Mix with equal amounts of water. Dose half a bottle per calf or large sheep or 2-4 bottles per head of cattle. (1bottle = 750ml)
2. Protect these feeds against rain. NPN is soluble and animals drinking such a solution can be poisoned.
3. Do not feed these feeds indiscriminately with other feed containing NPN. Consult an animal scientist.
4. Mix concentrates thoroughly with the prescribed ingredients.
5. This is a supplement and not a feed. Sufficient grazing and/or roughage must be available at all times.
6. Ensure that feed troughs are always full and give animal's free access to grazing.
7. A salt-phosphate lick must be fed for a minimum of seven days prior to feeding any animal a NPN containing lick.
