

# PRIME BROILER FINISHER

Registration No: V 17769 Act 36 of 1947

**Class:** Broiler Finisher Feed

**Form:** Pellets

## Description

The Prime Broiler range has been specially designed for small producers with performance as a benchmark, who market birds between 6 and 8 weeks of age. The rations in this range, except the post-finisher, include a coccidiostat and a growth enhancer.

## Benefits

The Prime feeding programme was formulated to optimise performance for a small to medium enterprise, considering environmental conditions and stocking density.

## Feeding Recommendations

The finisher ration should be fed to broilers from 29–32 days of age. The approximate feed consumption should be 950 g per bird. If birds are marketed at an older age (beyond 35 days), the amount of finisher fed should be adjusted to allow for a 5-day withdrawal feed to be used, such as a post-finisher.

## Expected Intakes

The approximate feed consumption should be 950 g per bird.

## Composition

Nutrient	Quantity	Unit	Min/Max
Protein	160	g/kg	Min
Fat	25	g/kg	Min
Fibre	50	g/kg	Max
Moisture	120	g/kg	Max
Calcium	6	g/kg	Min
Calcium	12	g/kg	Max
Phosphorus	5	g/kg	Min
Total lysine	9	g/kg	Min
