

# POWERLAY UTILITY-LAY

Registration No: V 16417 Act 36 of 1947

**Class:** Complete Laying Feed

**Form:** Mash

## Description

**Powerlay Utility-Lay** is designed to be used as a complete feeding program for hens in lay. It is formulated using grains and cereals.

## Benefits

Formulated as part of a feeding programme developed to optimise layer performance during different phases of production according to the hen's age.

## Feeding Recommendations

**Powerlay Utility-Lay** should be fed from 36 to 50 weeks of age. During this period feed intake will vary from an initial intake of 111 g to 117 g per day. Feed intake will be affected by environment, breed, housing and management. **Powerlay Utility-Lay** is recommended where only one feed is to be used throughout the laying period.

## Expected Intakes

During this period feed intake will vary from an initial intake of 111–117 g per day.
