

# LIQUID ELECTRICAL TAPE

The most FLEXIBLE TOOL for sealing and protecting electrical connections

100s OF USES

QUICK DRYING

WATERPROOFS CONNECTIONS

UV/SOLAR RESISTANT

CHEMICAL RESISTANT

PREVENTS CORROSION

REDUCES VIBRATIONS

Star brite Liquid Electrical Tape (L.E.T.) is the highest quality product available. Developed by Star brite® more than 30 years ago, it has since become the standard in the electrical and industrial industries.

The Star brite formula is superior to other liquid electrical tapes because it has a **vinyl base instead of rubber**. Rubber is fine for “dipping” tools to provide a secure grip, but it is not the best way to provide a secure, long-lasting, air- and watertight dielectric seal. **Rubber is susceptible to most solvents as**

**well as aging and cracking.** Star brite vinyl-based LET is extremely durable whether used **above or below ground or even underwater**. It will not crack or peel, remains flexible and is impervious to virtually all solvents when cured.

# LIQUID ELECTRICAL TAPE

- UL-tested product
- Seals and waterproofs electrical connections
- Fast-drying formula
- Impervious to oils & petrochemicals
- Helps protect against corrosion
- Easily built up for additional thickness
- Service range of -30°F to 275°F
- Dielectric strength of 1,276 volts/mil after curing

Adheres to:

- METAL**
- PLASTIC**
- VINYL**
- RUBBER**
- COMPOSITE**

and much more!
