

BOSS

## BOSS SPENNELEMENT

## TAPERBOSS

## FLENSNAV

## SVEISENAV

# BÖSSINGER

## Egenskaper

### Taperlock

- Enkel installasjon og fjerning.
- Trenger ingen maskinering, komplet utvalg av både metriske og tomme borer er tilgjengelig.
- Tomme borer er tilgjengelig.
- Godt utprøvd system, millioner er i bruk verden rundt.
- Passer til standard aksel dimensjoner.
- Kvalitets skruer er benyttet.
- Nøkler er ikke påkrevd ved enkle oppdrag.
- Den korte lengden på busten øker antall maksimum hull.
- Kvalitets innpakning, med instruksjonshefte.

### Adapter for taperlock

- Tillater at forboret produkter kan tilpasses for taperlock bruk.
- Unngår behovet for å bore, gjenge og kone hullet.
- Vanlig utvendig diameter eller utvendig kile er tilgjengelige.
- Er tilpasset alle store internasjonale standarder.

### Flensnav

- Designet for å passe til den universelle og populære "taper bush".
- En praktisk arbeidsmetode hvor produkter som vifter, rotorer, impellere og lignende tilpasses "taperlock" uten sveising.

### Sveisnav

- Produsert av lav karbon stål og utformet for å akseptere "taperlock".
- Gir en praktisk måte å sveise nav til vifter, rotorer, platehjul og lignende.
- Tre forskjellige design er tilgjengelig.

### Spennelementer

- Premium kvalitet med høy bearbeidingstoleranser og overflatebehandlinger.
- Bredt utvalg av størrelser og konfigurasjoner.
- Nøkkelfritt design.
- Enkel installasjon og fjerning.
- Null tilbakeslag eliminerer pasningskorrosjon og er upåvirket av vekslende dreiemomenter.
- Vinkel og aksial feilopprettings evne.

# BØSSINGER

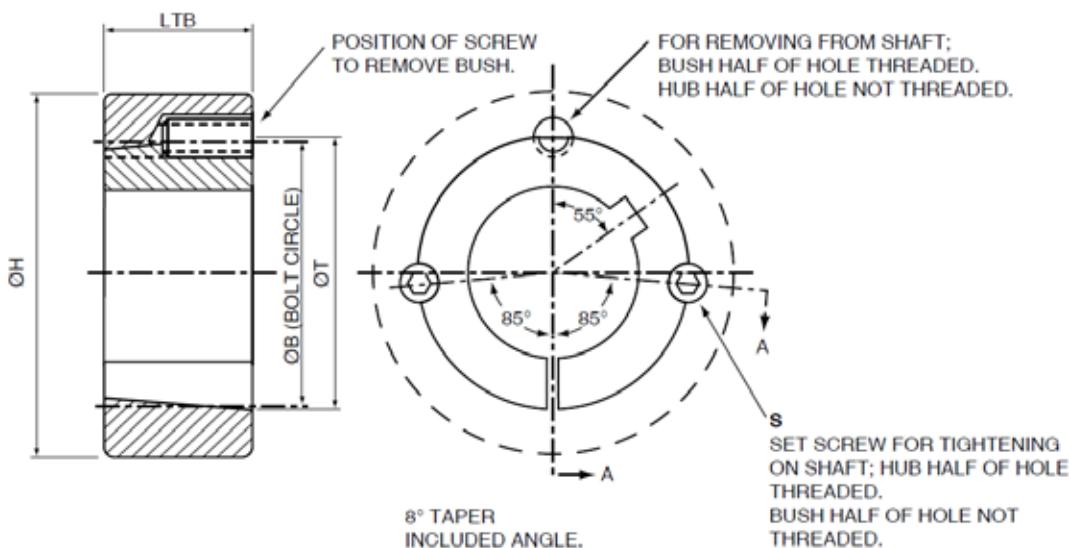

## Taperlock

### Utvalg og material spesifikasjoner:

Challenge sine taperlock er produsert etter de høyeste kvalitets standarder med GG22 - 25 støpejern, avhengig av størrelsen. Tynnvegget taperlock produseres enten fra C45 stål eller GGG (Close Grain) støpejern. Alle overflater er nøye maskinert til å gi maksimal kontaktflate og overføring av dreiemoment.

I overkant av 700 størrelser av Challenge taperlock er produsert og lagerført, noe som gjør dette til en av de mest omfattende programmene tilgjengelig i dag.

## Taperlock

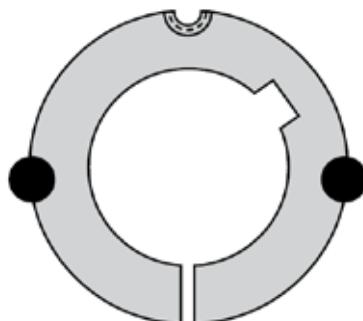

### Monering:

1. Pass på at kontaktflatene er rene og fri fra olje og skitt. Sett taperlocken i navet slik at festehullene er på linje.
2. Smør olje på gjengene på skruene og plasser dem løst inn i de gjengede hullene i navet som vist i figuren.
3. Rengjør akselen og passe navet og taperlocken til akselen som en enhet i den ønskede posisjon. Husk at taperlocken vil nappe skaftet først og navet vil da bli trukket litt videre til busk.
4. Bruk en sekskantnøkkel, gradvis stramme skruene vekselvis inntil stramt.
5. Hammer mot den store enden av taperlocken ved hjelp av en blokk for å unngå skade på taperlocken. Skruene kan nå strammes mer. Gjenta denne prosedyren til riktig dreiemoment er oppnådd fra tabellen nedenfor.
6. For å oppnå best mulig balanse, hvis en kile er ikke brukt, plasser kilesorene i taperlock og navet diametralt motsatt hverandre.
7. Hvis en kile skal monteres, finner du akselens kilespor før montering av bush. Det er viktig at kile med topp klarering monteres. Under ingen omstendigheter skal konet eller topp montert kiler brukes.
8. Etter at applikasjonen har kjørt i en kort tid, sjekkes skruene.
9. Til slutt fyller man alle tomme hull med fett for å utelukke skitt og hindre korrosjon.

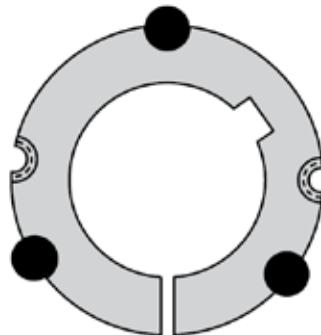

### Demontering:

1. Løsne alle skruene og fjern en eller to skruer, i henhold til antall fjernings hull (se diagram).
2. Smør olje på skruen(e) og sett den eller dem inn fjernings hullet (ene) og skru ned til taperlocken løsner. Hvis taperlocken ikke løsner umiddelbart, bank lett på navet.
3. Fjern taperlocken av akselen.

**NOTE**

CHALLENGE can manufacture larger taper bush Str.s including 6050, 7060 and 8065. These are available to order with the following maksimum Indre diameters:

6050 150 mm or 6"

7060 175 mm or 7"

8065 200 mm or 8"

Pilot Indre diameter taper bushes in these Str.s are also available.

#### NOTE

Challenge can manufacture larger taper bush Str.s including 6050, 7060 and 8065. These are available to order with the following maksimum Indre diameters:

6050 150 mm or 6"  
7060 175 mm or 7"  
8065 200 mm or 8"

Pilot Indre diameter taper bushes in these Str.s are also available.

## Flens-nav

Flens-nav for taperlock er designet for bruk med universelt akseptert taperlock systemet. De gir en praktisk måte til å sikre vifte rotorer, løpehjul, agitatorer og andre anordninger som må være solid festet til aksler.

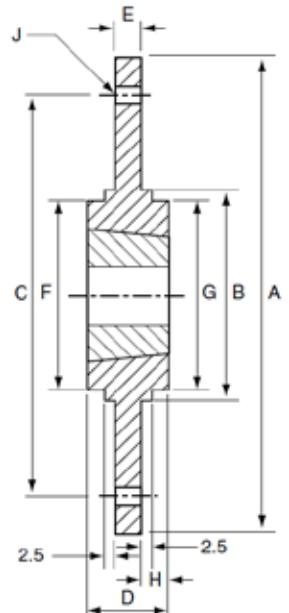

Challenge sin flens-nav, type SM er produsert fra GG22 støpejern og har fosfater for ekstra rustbeskyttelse.
