

GELATIN STUDY | concept & production & styling

December 2014

research by sweets

glossy | elastic | colourful | transparent | JELLY

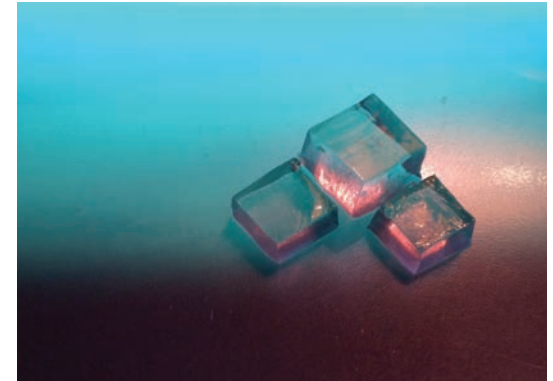

inspired by japanese sweets

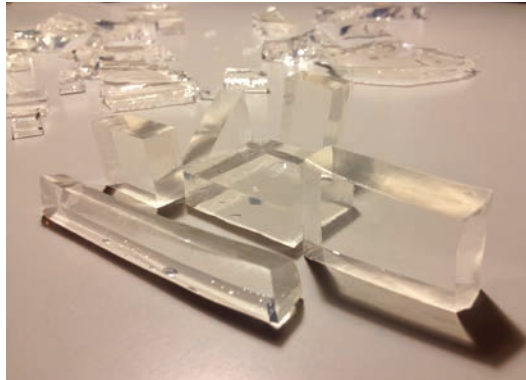

material test:

Agar-Agar (material test always on the left side in the pic) & Gelatin (on the right side)
tests with dosage: amount | stability | transparency

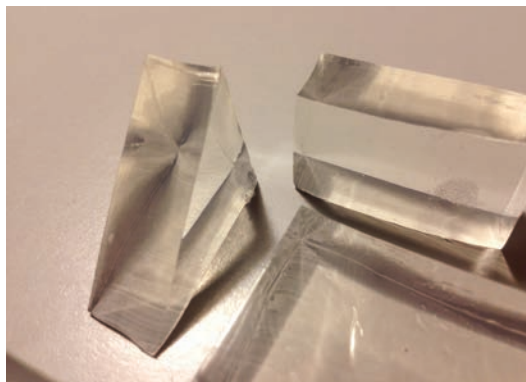

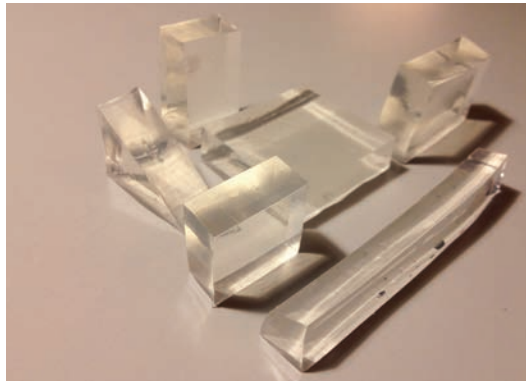

Gelatin with twice dosage

Agar Agar (above) and Gelatin (below) with standard dosage | not stable enough

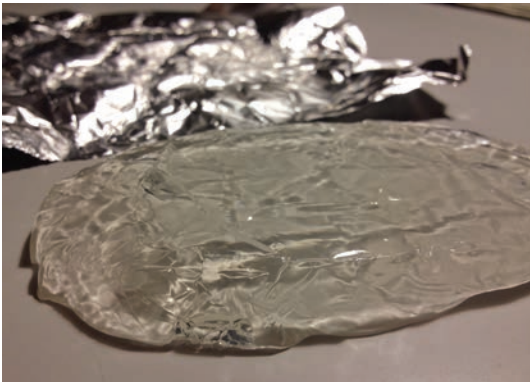

Agar-Agar by triple dosage

tests with bottom layer and mould

baking paper

aluminium foil

ceramic mould

use of forms
inspired by TANGRAM
