Expected landing point

2014

Copper capillary solder fittings, rope

Dimensions variable

Installation at a public library, 2021

Photography: Dominik Zietlow

Press:

„Etter beschäftigt sich in «Expected landing point» mit den Flugbewegungen von Insekten. Anregung fand er im Gedicht «Die Hoffnung leuchtet wie ein Halm im Stall» von Paul Verlaine, das mit den Zeilen beginnt:

Die Hoffnung leuchtet wie ein Halm im Stall.

Was fürchtest du die Wespe, die ihr wilder Flug berauscht?

L'espoir luit comme un brin de paille dans l'étable.

Que crains-tu de la guêpe ivre de son vol fou?

Das Bild der Wespe, die wie trunken von der Wildheit der eigenen Bewegung durch die Luft taumelt, hat Jonas Etter zu der Frage geführt, wie Insekten denken und entscheiden. Wie bewegt sich ein Insekt? Wie entscheidet die Wespe, wann und wo die Flugrichtung gewechselt wird? Steckt hinter dem rasanten Zickzackmuster, das auf menschliche Beobachter chaotisch wirkt, ein Plan? Oder folgt die Flugbahn eines Insekts Zufällen oder Außenfaktoren, die für uns nicht wahrnehmbar

sind? Etter interpretiert das Flugverhalten der Insekten im Sinne der Heuristik, also der Kunst mit begrenztem Faktenwissen allein durch kluges Schlussfolgern zu interessanten Lösungen zu gelangen. Er lässt sich dabei ebenso von seiner Neugier und Beobachtungsgabe wie von den Eigenschaften des verwendeten Materials lenken. In den zahlreichen Ecken und Bögen seiner Installation erkennt er eine Analogie zu den häufigen Richtungswechseln im Insektenflug, die möglicherweise Rückschlüsse auf das Denken, Planen und Entscheiden dieser Tierart zulassen.“

Alice Henkes in AC-Zeitung 2014

2020

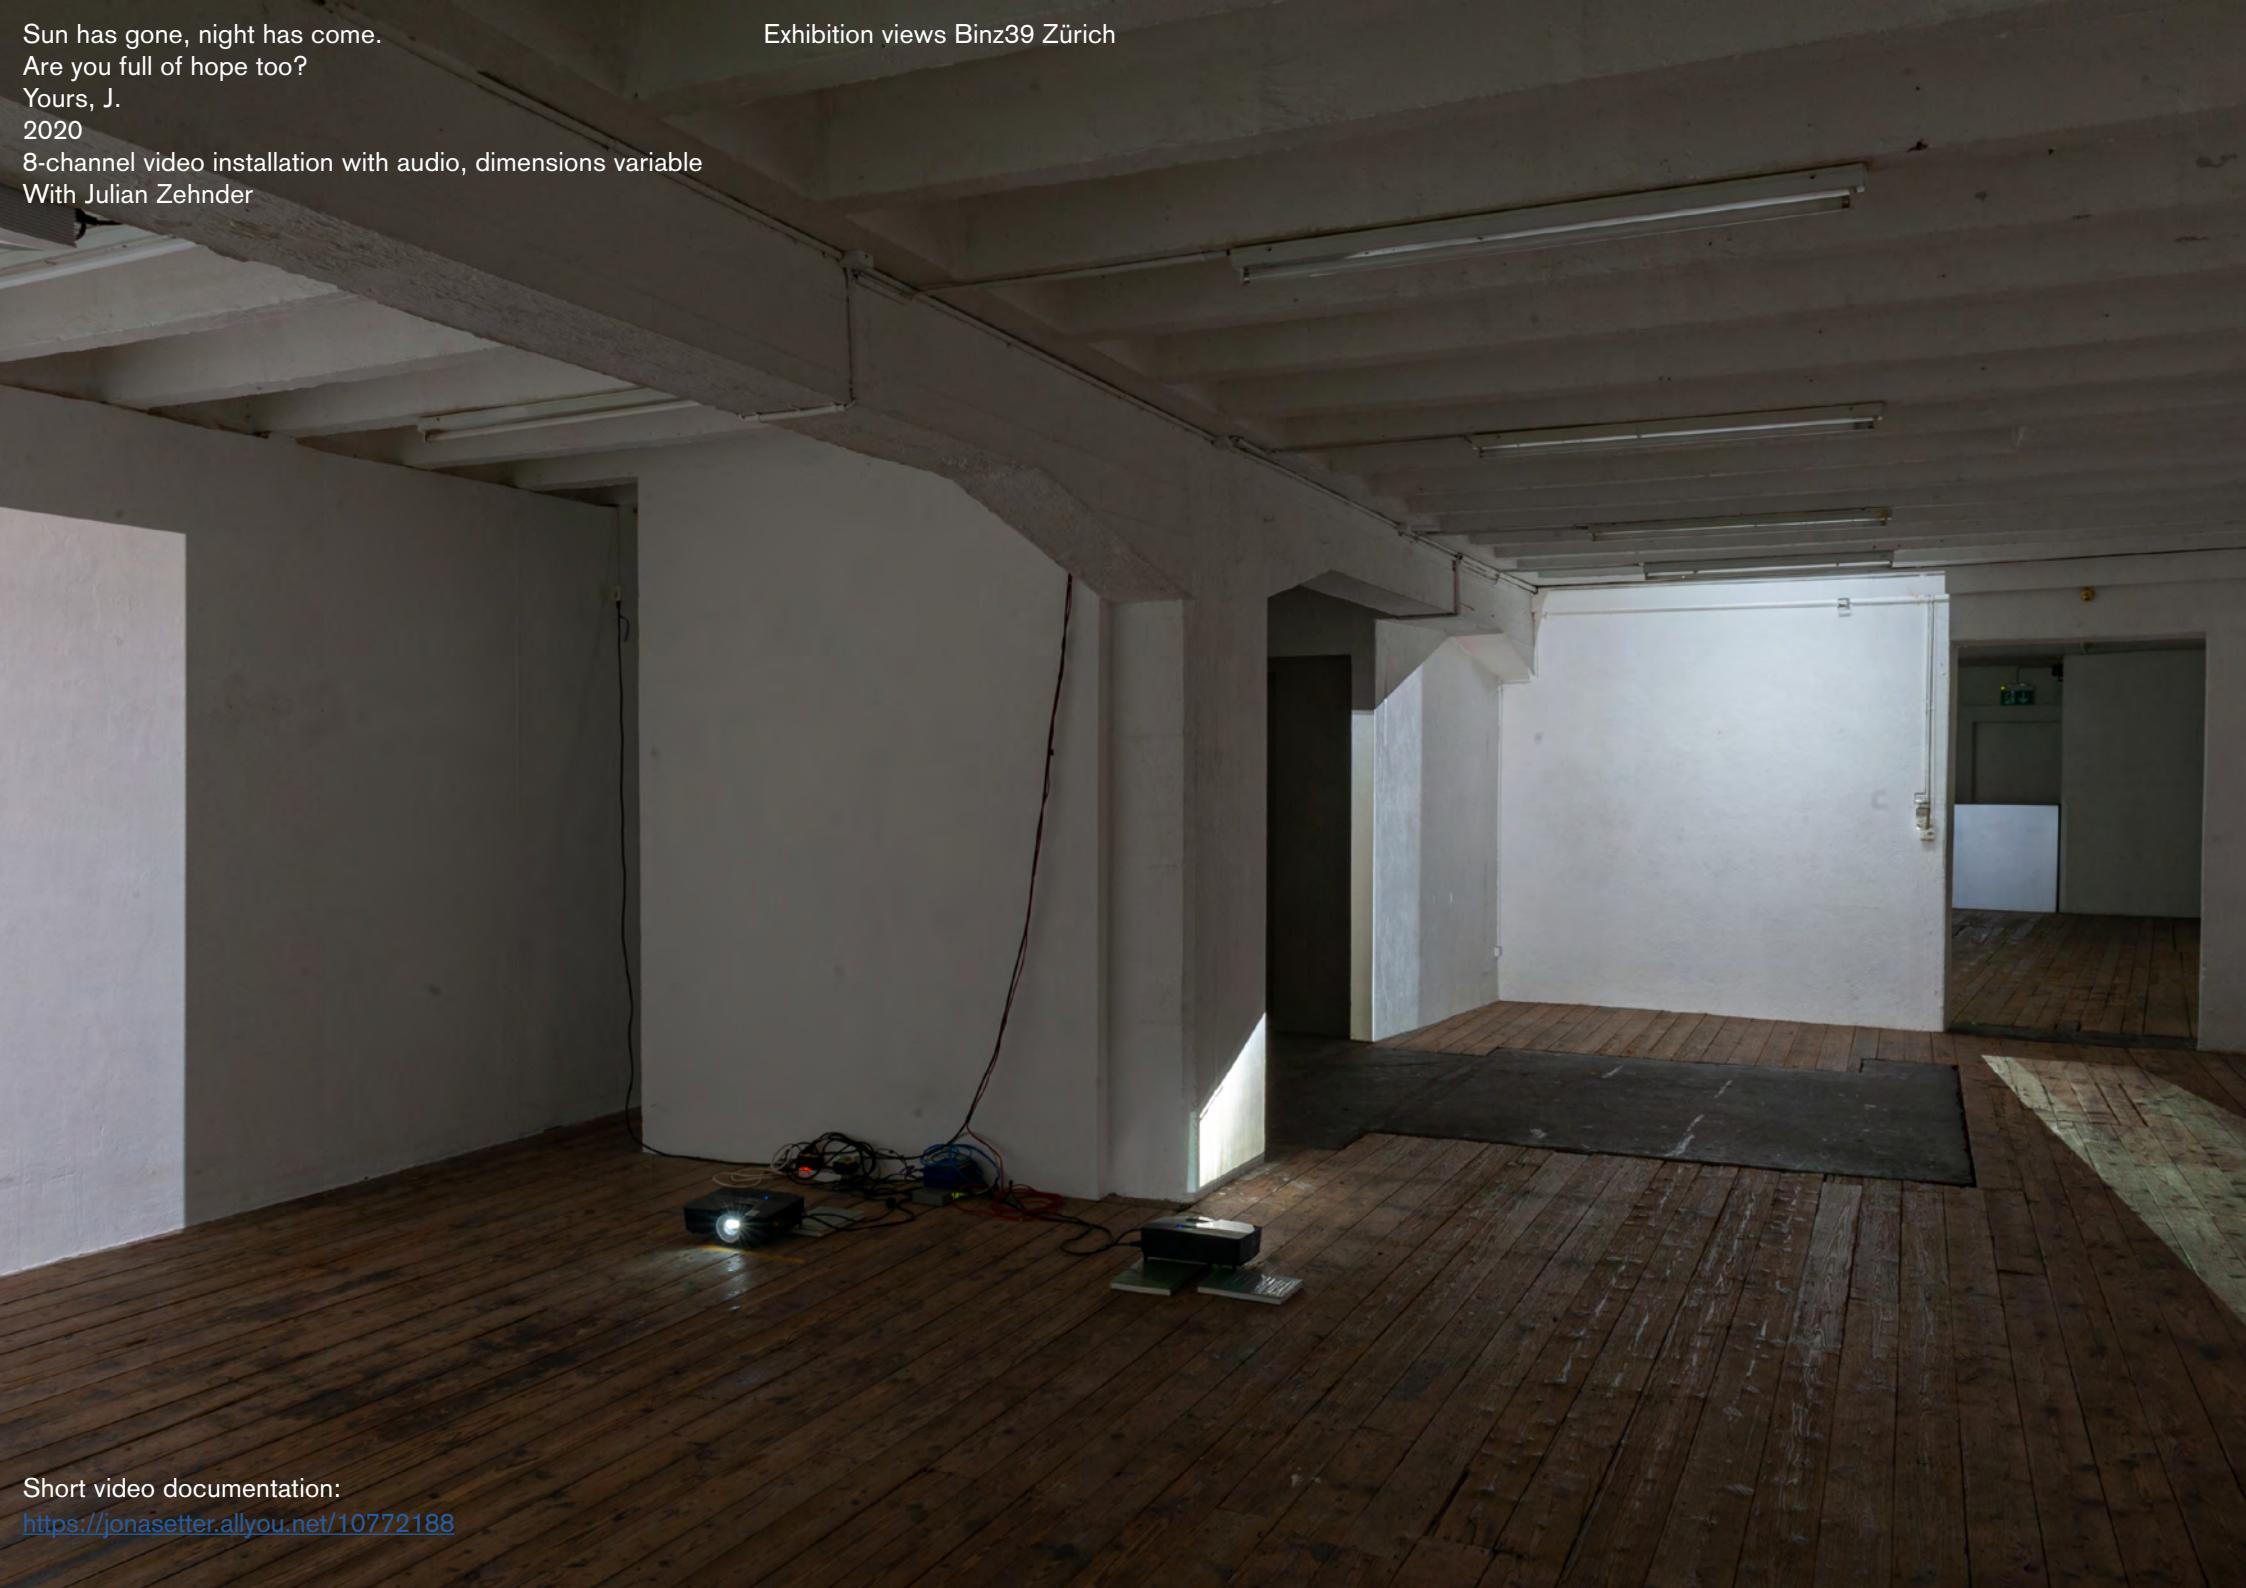

8-channel video installation with audio, dimensions variable

With Julian Zehnder

Exhibition views Binz39 Zürich

Short video documentation:

<https://jonasetter.allyou.net/10772188>

Exhibition views and detail: Binz39 Zürich

„Sun has gone, night has come. Are you full of hope too?
Yours, J.“ (work in progress) is a collaboration with composer Julian Zehnder. The 8-channel video installation with sound shows filmed wall surfaces distributed over three connected rooms. The rooms of the installation become light (or dark), respectively, when the video shows the walls as illuminated (or not), i.e., at the moment when the original room lighting was switched on (or off). The 8-channel video installation with sound is a composition of footage of the wall areas in all three of the connected rooms the exhibition space consists of. Over the duration of the filming by switching on and off the original room fluorescent lamps, the filmed walls cause the respective room to be enlightened, then go dark again.

The starting moment, the ballast unit and the fluorescent tube itself are the decisive agencies that determine order, rhythm, pitch of the lamp noises, volume, and brightness—and all of this multiplied by 21, for the number of lamps in the room. Each actuation of the „switch-on experiment“ causes an event—momentary and singular. Based on these serially recorded switch-on and switch-off events, a composition unfolds—a composition toying with synchronicity vs. asynchronicity and with unison vs. polyphony.

sun has gone, night has come, are you full of hope too? yours j.

Materialranking (I+II+III+IV+V)

06-2009 / 11-2010 / 11-2012 / 12-2017 / 03-2020

Ink on paper, walnut, museum glass

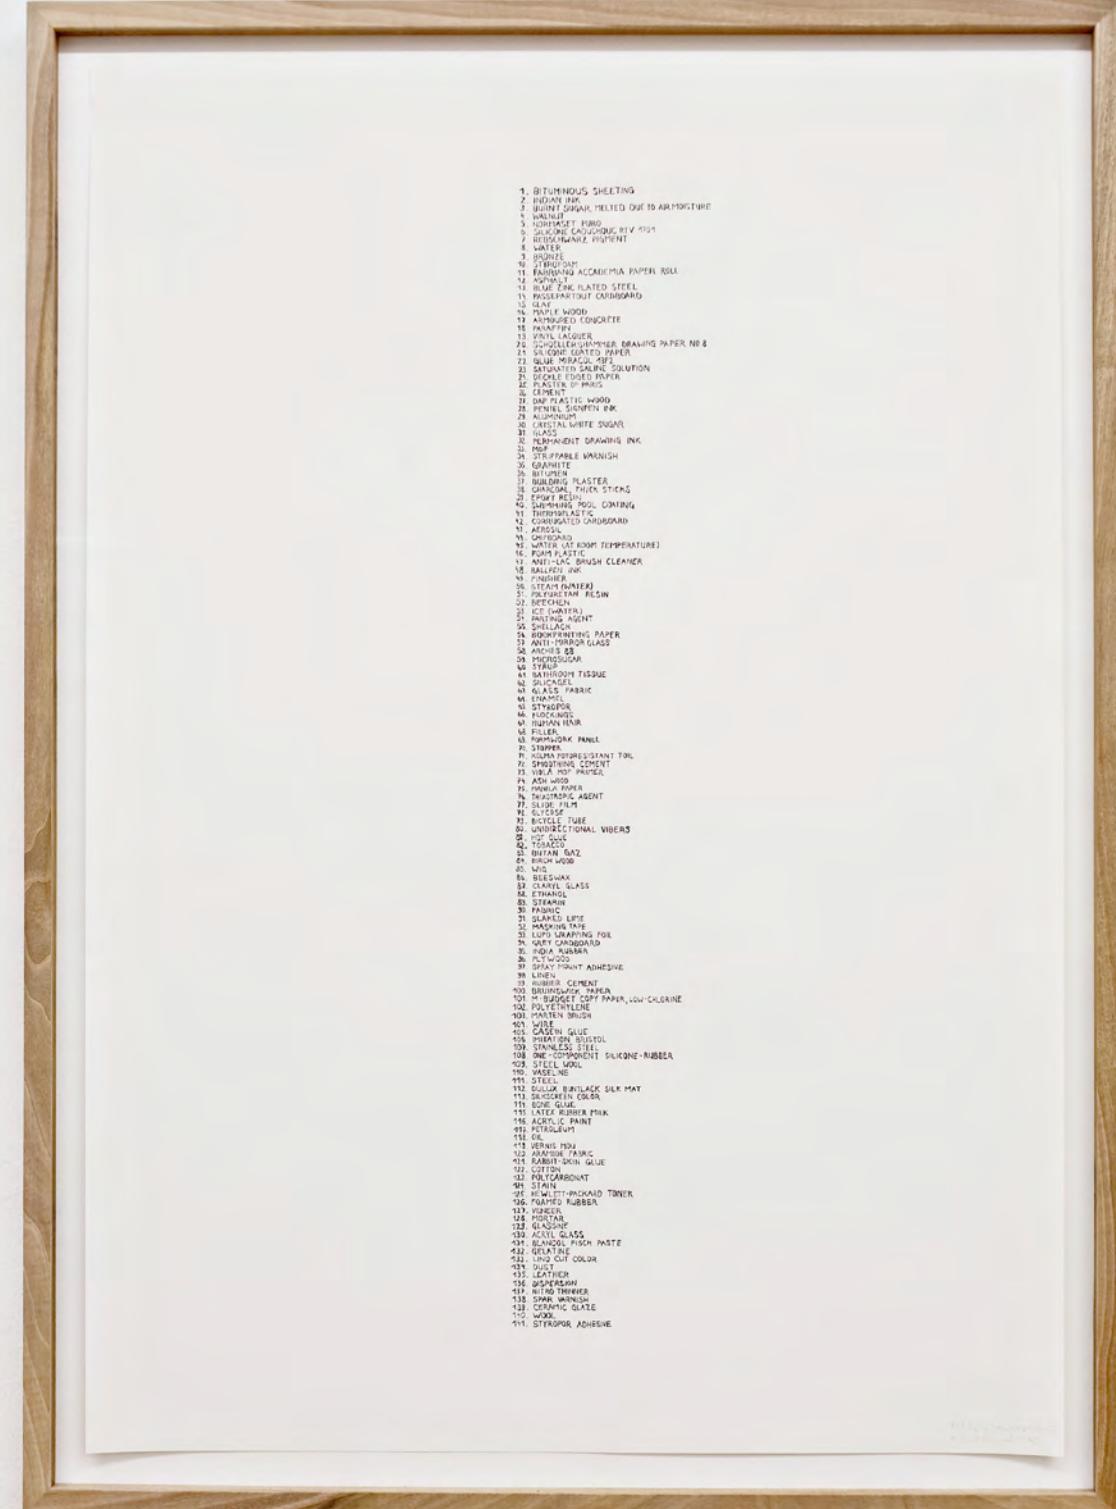

100 x 70 cm

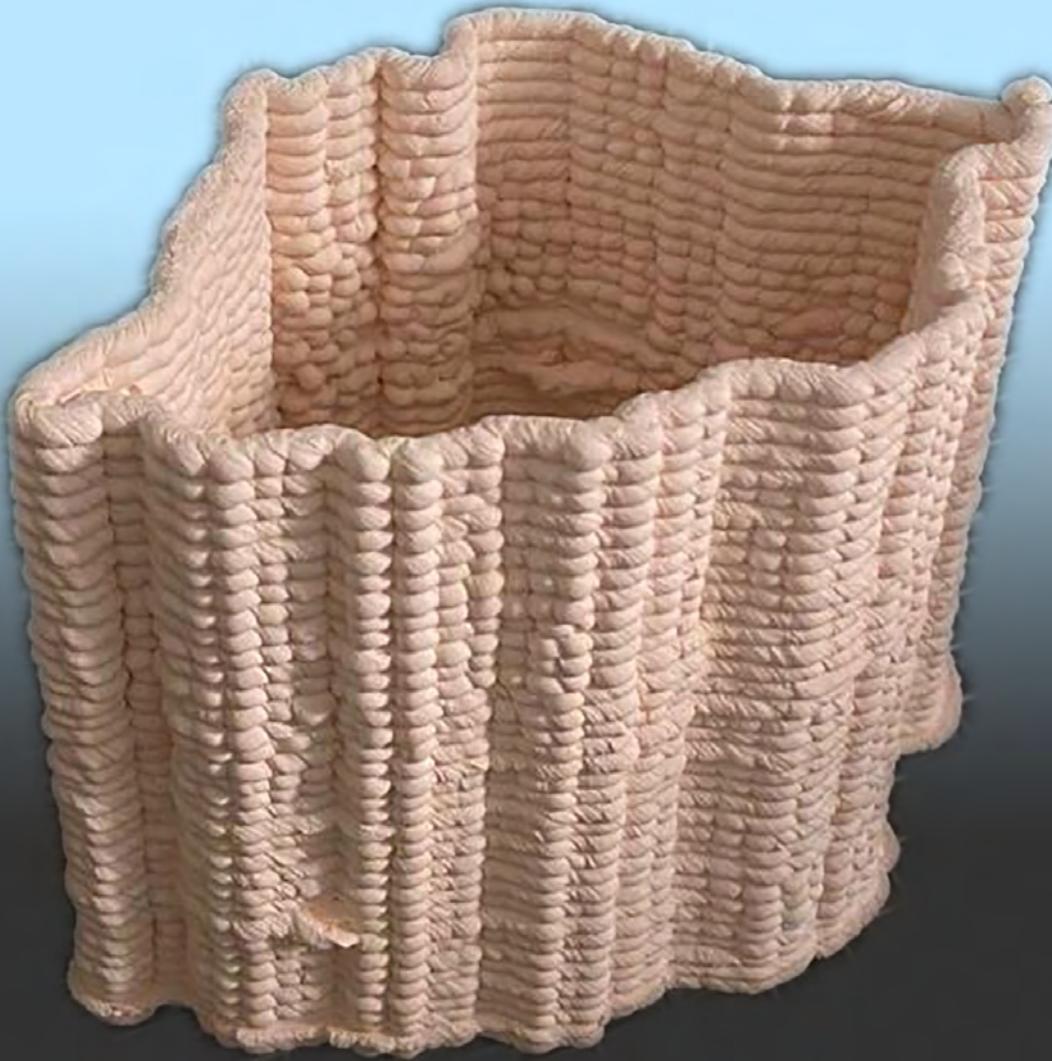

Exhibition views & detail: Kunsthause Langenthal

Materialranking (I+II+III+IV+V) is a series of handwritten lists that show all materials used or considered for using in the artists work.

The subjective value given by the artists is calculated along two categories:

1. Value of technical ability according the production of the artists artwork.
2. Value of visual, tactile, olfactory and conceptual impact on the artwork.

Trophy I (Part of "Labor Luck and Legerdemain I")
Work in Progress
2020

READING PIECE "DEAR D."
2019

--

LEFT CHANNEL 0:00

Dear D,

February 18, Zurich

I sit on my chair at my improvised desk, in my free studio, that will be mine for another eight months. Not a very long time. But long enough to bring up a bunch of works, let me put it as: a complex body of work. My wish!

I am asking myself what to do if you don't know what to do. I clean up, sort out, read in, postpone, curate my calendar, do sports (cross-country skiing and swimming are my darlings).

This morning my alarm rang at 5 am. I was awake ten minutes before, so I could turn off the reminder(phone). Why, D? I know you'd say: flurry!

This time I would not negotiate, I accept.

The early morning was quiet, as I love it. I ate a banana, poured some coffee, jumped into the V70. It didn't wanna start but finally it did.

Swimming lesson for the first time. Crawl stroke.
Water I love you. I only hate to breathe, progress will come.

At 8 I was back at home. I sat at the table feeling the fire in my body.

Yours,
J.

RIGHT CHANNEL 2:00

Dear D,

February 18, Zurich

Today it's a sunny day. Today is the day to write you this letter. Today is a bright day, for you my dear D. I set it up starting with these five letters – D-E-A-R-D – ending with six of them.

I rummage through my hard drive wondering what I did over the past years. Somehow it feels like reading a diary of someone else. Maybe asking Spotlight: What is indexed by the keywords LUCK? LABOUR? SLEIGHT?

The result is fragmented, not helping me much. I know about the importance of those words, but it is hidden in a bubble.

Yours,
J.

LEFT CHANNEL 3:24

Dear D,

February 19, Zurich

Recently I took a shine to mornings. No more nightingale's life. Work-life-balance. Do you think it's the age? How old are you?
Mostly I transform quickly, from horizontal to vertical. The sun helps these days. It feels like California (like in the movies).

It seems rather impossible to write something poetic, my thoughts are factual and banal.

I long for more passion for you!

Look here's a list of what is on my desk now:

- Two pieces of Pavatex, painted white on both sides.
- A new, only two pages used, red notebook. I bought it yesterday, it's a paperback, not very useful, but cheap.
- Underneath, my gloves, black leather, Italian brand, quality - average, but warm and useful.
- Hamlet leaflet – about M.'s work: "Die Erzählung führt uns in einem grossen Bogen von der auf einer Partnersuchewebsite gestellten Frage: «Do you think one person can significantly change the world?» zum siebenundneunzig prozentigen MATCH der Erzählerin [...].
- documenta 14: Daybook. Blue plastic cover, about 2.3 cm thick.
- Above the documenta daybook Matthias Gabi's Shot on iPhone

- The reader of the Monster Academy.
- An untouched diary called KLAR-HEIT.
- Denim in the shape of a baseball cap.
- "Pukka Beautiful English Breakfast Tee Bio 6.90 including tax."
- There's more plastics: 3 Chargers two white, one black
- A metal box handfolded, polished outside, a simple system; covers 10 different metal example sheets.
- A black sweater - wool
- A pile of blue, green and reddish post-its
- A few chocolates
- The plastic thingy that easily provides both sides adhesive tape. Its red.
- Peter Geimer: Fliegen, Naturkunden No. 45, 2018, Matthes & Seitz Berlin a nice little book about the annoying but very important species.

Yours,
J.

RIGHT CHANNEL 7:35

Dear D,

February 20, Zurich

Coming back to the same page. Bored I sit in the middle of my messy studio. They look at me, those dead little sculptures extruded from a block of clay. A little hammer, a nebulizer, the wax melted along a wolfram wire and all those half full half empty cardboard boxes, containing traces of ideas. Old ideas.

Look at this pile of blue album covers, they are an old duty. Do we have to get rid of duties first to make space for something new?

Yours,
J.

--
SILENCE (VERY SHORT)
--

LEFT CHANNEL 8:37

Dear D,

February 20, Zurich

This is about the wish to be someone else.
I feel the rhythm of my heart in my head.

When do you tidy up your desk? When is it enough? What amount of old inspirational stuff do you need standing around in your studio? It's a big deal for me. Throughout unproductive weeks in my studio I feel everything is physically frozen, only the pixels on my computer keep moving, dancing. I have even to vacuum clean it's ridiculous. But it makes things move!

Yours,
J.

--
SILENCE (SHORT)
--

LEFT CHANNEL 9:45

Dear D,

February 20, Zurich

It's me again. I can't forget the strong image of Arthur Worthington who obsessively tried to capture a splash of water in slow motion, splashing in milk to finally find out that every single splash is unique, destroying his ideal of how systematic nature must have been constructed. But what if every single splash ever recorded by a super slow-motion camera would have been somehow modelled together? Would it become the Uniform?

Yours,
J.

--
SILENCE (LONG)
--

RIGHT CHANNEL 11:17

Dear D,

February 21, Zurich

Sun has gone, night has come. Before I feed myself, I have to catch at least one single idea in my mesh of neurons. I insist. Usually this kind of self-torture produces it. It has worked out many times before. Are you full of hope too?

Yours,
J.

Press:

"In the heat which stirs up the smallest elements; among sugary fluids and turbulence; on the inclination of atoms within aluminum; in the midst of the formation process that requires heat and power - almost random in its outcome - the story of clinamen touches upon the work of Jonas Etter: "Who Thinks For a Long Time, Does Not Always Choose the Best." The energy is enclosed - both in the sugar masses and in the aluminum column. Total of 350 kilograms of melted sugar form six objects. The flow of each new layer of burnt sugar cannot be exactly estimated. This slight change is the introduction of disorder into a system solidified into a temporary equilibrium. A possible character with its total energy of 5.86 GJ. A counterpart and a second character is a column of approximately 220 meters of aluminum foil compressed with a hydraulic press. Embodied energy of this character is 211 GJ per tonne. This is what is before us: the flow of abundance, luxury, implicit energy. The turbulent flow frozen for a moment. A rendering from the clinamen. Swirling atoms creating things.

Within the atomic modification, objects become protosemantic. They are before any meaning, ready to inscribe a new one. The voice over them reads a diary - a discipline of observation and precision. Through voice, objects become characters, with an alphabet of atoms. Clinamen is a poetic device as much as it is atomic."

Das Jost-Sigristen-Haus beim unteren Hengert (Dorfplatz) in der Walliser Gemeinde Ernen wurde 1581 durch «Martinvs Iost Maior et Banderatus» (Martin Jost, Meier und Bannerherr) erbaut. 1771 / 72 erhielt das Haus seine heute noch grösstenteils vorhandene Ausstattung durch Iacobus Valentin Sigristen (1733–1808), einen typischen Vertreter des Ämterpatriziates im späten 18. Jahrhundert. Sigristen ist als der letzte Landeshauptmann des alten Wallis vor dem Einmarsch der Franzosen in die Geschichte eingegangen, er ist also das letzte Regierungsoberhaupt des feudalen Wallis, bevor die Französische Revolution in Form der Helvetik in der Schweiz Einzug hielt. Finanziert mit den Mitteln aus dem 1979 gewonnenen Wakkerpreis richtete die Gemeinde 1989 zusammen mit der Stiftung und Vereinigung Heimatmuseum und Kulturflege in Sigristens Wohnhaus ein Museum ein, das den Besucher*innen den Alltag eines Landeshauptmannes im alten Wallis näherbringen soll. Warum ausgerechnet zum 200-Jahr-Jubiläum der Französischen Revolution einem opportunistischen Vertreter des Ancien Régime in der Schweiz ein Denkmal gesetzt wurde, darüber schweigt die offizielle Kommunikation der Gemeinde Ernen.

Die Dauerausstellungen in Lokal- oder Regionalmuseen, die in der Schweiz ein Drittel aller Museen ausmachen, bleiben oft über Jahre unberührt, die Exponate sammeln Staub an und konservieren so ihre künstlich inszenierte Vergangenheit. In Ernen gerät diese Dornröschen-ähnliche

Idylle im Sommer 2015 durcheinander: Eine Drohne dringt in das Haus ein, fliegt in Dämmerung und Dunkelheit scheinbar zielloos durch die Räume. Sie überwacht, aber ohne Ziel, sie sucht, aber scheinbar ohne zu wissen wonach. Eine tierähnliche Maschine, ferngesteuert oder programmiert, fliegt in eine künstlich angelegte Vergangenheit – die Maschine bringt die «böse» in die «gute» Künstlichkeit. Plötzlich dringt die Hochtechnologie auch noch in die historische Welt ein; in der ländlichen Idylle hat sie ja schon längst ihren festen Platz in den Spielzeug-Arsenalen der Dorfjugendlichen, die damit in den Hängen Gämsen oder Steinböcke suchen und es lustig finden, sie ferngesteuert herum zu jagen.

Warum aber die Drohne im Museum herumfliegt, wird nicht klar. Wer die Eindringlinge sind, wonach sie suchen und ob sie gar etwas stehlen wollen, lässt sich nicht eruieren. Die Gemeindepräsidentin erhält Anrufe von besorgten Bürgern. Auf der Drohne ist eine Taschenlampe montiert, die – einem Suchscheinwerfer gleich – ihren Lichtkegel da- und dorthin schweifen lässt und bestimmte Gegenstände, Wände, Möbel plötzlich in ihr weiß-fahles Licht taucht. Wäre es eine Kamera, könnte man vermuten, dass es sich um ein Google-Museum-Projekt handelt, eine dieser unreflektierten Digitalisierungen mit dem Zweck, das Image des neoliberalen High-Tech-Giganten kulturell ein wenig aufzupolieren. Dem ist aber nicht so. Das unbeholfene, manchmal fast unkontrollierte, aber um Vorsicht bemühte Manövriren der Drohne führt dazu, dass der Lichtkegel manchmal sehr zielgerichtet und manchmal völlig zufällig gewisse Objekte in grelles Licht taucht oder sie bloss streift. So entstehen kleine, nur für Sekundenbruchteile sichtbare Arrangements und Ausleuchtungen. Diese immer wieder aufleuchtenden Bilder werden von einer Video-kamera dokumentiert. Einzelne Stills werden überlagert. So entstehen über den Umweg des Videobildes Mehrfach- bzw. Langzeitbelichtungen. Das sieht bisweilen aus wie das Resultat einer spiritistischen Sitzung, oder wie das Aufleuchten einer Vergangenheit, die so nie existiert hat.

Put down that cocktail

2016

Pigment print on polyester, mini ventilator

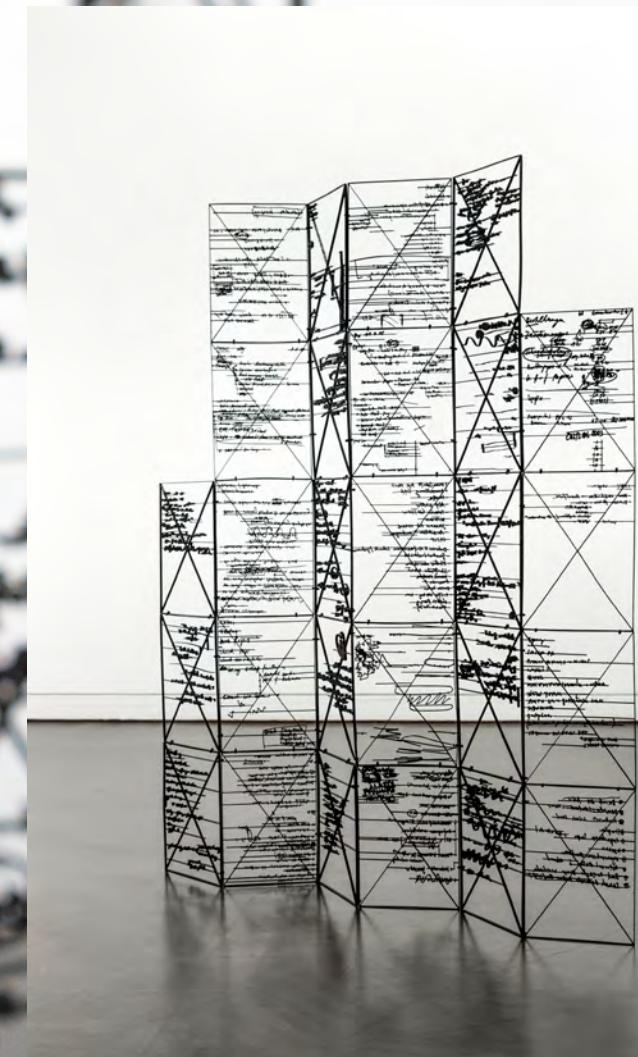

210 x 325 x 50 cm

„Put down that cocktail“ is part of a series of works in which the artist deals with handwritten todo-lists, which he archives in banana boxes since the beginning of his activity as an artist. The act of writing todo-lists does not only consist of writing down things that one does not want to forget, it also represents the state of a completely economized existence that we expose ourselves to. Put down that cocktail is a reference to the open source video encoding software Handbrake, which, once the processing of the film files is complete, instructs the user to turn off the cocktail and get back to work.

April 28, 2019

Dear D,

By using the method of collage,
I am interested in bringing
 together
things that are separated
in reality (at least until now) (as far as I know).

In order to provoke something new,
you follow something that seems to
be impossible. You raise expectations
of being overwhelmed

by the result.

It is obvious that this might be a failure per se.

But sometimes curiosity is bigger than rationality.

And it's always biased.

I am biased,
the things are biased,
the collage (apparatus) is biased.

I'm hopeful for:
bias + bias + bias equals unbiased.

BIAS is such a nice word!

Yours,
J.

April 29, 2019

Dear D,

May I ask you a decent, not very demanding favor? I need someone to translate the following words into English. It should be descriptive and slightly pretentious. I think it could become a nice bridge from the introduction (yet to write) to the explanation how my work is connected to the topic.

«Die Show ist durch, die Arbeit getan. Fotos und Video von der Ausstellung existieren auf meiner Harddisk. Wie man es eben macht. Doch deren Physis ist nun in Plastikkisten und Plastikfolie, luftdicht verschlossen in meinem Lager, also in meinem Atelier. Welchen Sinn würde es machen, dieses Material zu lagern, wenn man nicht exakt dem Material, das in der Ausstellung stand – und insofern eine Geschichte mit mir und dem Ort und auch mit den Zuschauern (und über deren Gedanken auch mit dem Immateriellen der Arbeit) hat – eine Agency zuweisen würde?

Ich fange erst an, mein Bedürfnis mit dem Material weiterhin verbunden zu sein, zu verstehen. Wissen folgt Intuition.»

D! I'll appreciate it!

Yours,
J.
