

FENIX^{NTM}

FENIX[®] are the innovative materials for interior design. Applying proprietary technologies, the external surface of FENIX is characterized by the use of next generation acrylic resins, hardened and fixed through an Electron Beam Curing process. With low light reflectivity, FENIX surfaces are extremely opaque, soft touch and anti-fingerprint. Thermal healing of superficial micro-scratches is also possible. Three types of materials are available: FENIX NTM[®], FENIX NTM Bloom[®], FENIX NTA[®]. Introduced in 2013, FENIX NTM is a technical and aesthetic answer to two interior design trends: smart materials and matte surfaces. A material with timeless colors for vertical and horizontal applications.
