

SF250 Duke / WF457 Castanho

Sustainability

Our substrates are made from wood fiber that is sourced as recycled, recovered, FSC® certified and/or controlled, per FSC® Chain of Custody and Controlled Wood standards (FSC-C019364). PRISM TFL on VESTA ULEF panels, complies with TSCA Title VI / CARB-2 and meets relevant green building standards including LEED, Green Globes, IgCC, and the CALGreen Code. ARAUCO offers cradle-to-gate information through the industry-wide Environmental Product Declarations (EPDs) for particleboard and MDF manufactured in North America.

LEED Category			
	MR 4 Recycled Content	MR 5 Regional Materials	MR 7 Certified Wood
Possible Points	1 - 2	1 - 2	1

Want smart? Life-Cycle Assessment (LCA) data for PRISM can be found within the EPDs and Transparency Briefs. ARAUCO HPDs are consistent with our responsible ingredient management policy and are complementary to our LCAs. The HPDs may also contribute to points in LEED v4.

PRISM
LOVE YOUR LAMINATES

PRISM is a colorful, thermally fused laminate brand that has real character with a designer-friendly focus. Our spectrum of styles and textures will open your eyes to a bright new world of laminates! Let PRISM take your designs to the next level with true-to-life laminates that are durable and authentic to the touch. PRISM TFL is ready to install vertically, horizontally – or go diagonal! We're a smart surface that you can love.

Bring more of the outside in with our latest woodgrains and textures. This collection of over 70 PRISM-exclusive designs, includes 11 design debut introductions to take your creativity in a new direction.

A fresh array reminiscent of the ocean, sun bleached neutrals and archetypal earthen pottery. Let's take the reassuring presence of nature and make something beautiful.

PRISM TFL is raising the bar for the composite panel industry with InCopper™ antimicrobial technology. This proprietary technology incorporated in PRISM TFL exclusive designs*, protects the surface of the panel, actively inhibiting the growth of microorganisms that cause deterioration, stains or degradation. The formulation consists of naturally-occurring copper salts that remain active as long as the panel surface remains intact.

PRISM is your perfect partner.

PRISM TFL on high quality particleboard and MDF substrate, is manufactured entirely by ARAUCO at our facilities across North America. We manage our own inventories to maintain a current and balanced design offering and a dependable supply you can count on.

* Available only in the US as specified at the time of order.
Note: That this product does not protect the users or others against bacteria, viruses, germs or other disease-causing organisms.

PRISM Symmetry

PRISM TFL is all matched up! Our Symmetry Program features a wide array of complementary products. Edgebanding, HPL, 3DL, doors, wrapping and moulding products are available for our entire collection.

The partnership we have with these suppliers will ensure that your project has a cohesive and natural look. Please refer to prismTFL.com for full listings and details.

HPL (High Pressure Laminate)

3DL (Laminate)

Doors

Edgebanding

Composite Panels & Substrates

PRISM TFL is available with a range of ARAUCO's standard and specialty panel substrates and grades. We can accommodate your design considerations for things like safety and practicality by specifying fire-rated, moisture-resistant and even environmental-friendly, low-emitting substrates. Mill-to-mill availability will vary.

Please contact your account representative for production capability and minimums.
