RAUVISIO SURFACES

Minimal processing for high-quality interiors

THE DESIGN WORLD OF RAUVISIO

The surface range from REHAU

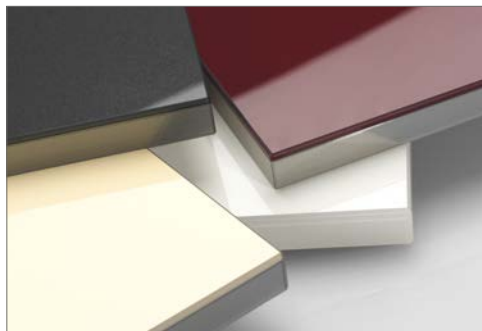

Clean surfaces and a minimalist look are a big trend in furniture design. RAUVISIO is an innovative surface range fully in line with this trend, leaving nothing to be desired. Here, you will find the right solution for any environment.

The glass for carpenters

RAUVISIO crystal

With its RAUVISIO polymer glass laminate, REHAU offers maximum flexibility for the production of fronts and splashbacks as well as furniture end panels with a glass effect. Culminating in a puristic design, which although giving the aesthetic appearance of real glass, offers the flexible processing characteristics of polymer laminate.

Brilliant design with a seamless look

RAUVISIO brilliant

The high-gloss laminate, RAUVISIO brilliant is a shining example of the latest trends in furniture design and home interiors. Thanks to its brilliant depth effect, RAUVISIO brilliant replaces high-quality lacquered elements and enables you to create outstanding designs for covering vertical furniture fronts.

Textured surface with a wave effect

RAUVISIO wave

RAUVISIO wave impresses with its unique surface texture. Material attributes can affect the way in which the light interacts with the surface, creating fascinating patterns.

This polymer surface material is ideal for use in front panels, or to create features in commercial and retail environments.

RAUVISIO SURFACE MATERIALS

Advantages for your customers at a glance

In addition to the advantages it offers in fabrication, the RAUVISIO product family also offers numerous advantages for consumers in finished applications.

In order to provide you with better sales arguments for your customers, you'll find an overview of all the consumer advantages of RAUVISIO surface materials here.

We would be happy to help you if you still have any questions. Simply get in touch with your REHAU contact.

RAUVISIO crystal

The polymer glass laminate

Hygienic cleanliness

RAUVISIO crystal fronts have seamless joints, which prevents the accumulation of bacteria and germs in the joint area.

Easy to clean

The surface is lacquered, making it very dirt-resistant. Dirt can easily be cleaned with water and a microfibre cloth.

Scratch-resistant

The products high scratch-resistance makes it ideal for environments exposed to daily wear and tear. Your surface looks newer for longer.

Can be written on

High-gloss surfaces can be written on with regular whiteboard markers. For matt surfaces the use of chalk is recommended.

Impact-resistant

RAUVISIO crystal is ten times more durable than real glass, so it can withstand even heavy impacts. Damaged surfaces will not chip, preventing the risk of injury from sharp edges.

RAUVISIO brilliant

The high-gloss laminate

Brilliant depth effect

RAUVISIO brilliant fronts have excellent depth effect and surface smoothness. They maintain a high-gloss surface with a seamless look.

Extremely UV stable

RAUVISIO brilliant fronts are colour and UV stable. The fronts will not discolour, even after many hours of sunlight. The fronts will not discolour, even after many hours of sunlight. For beautiful furniture that will last.

RAUVISIO wave

The textured laminate

Hygienic cleanliness

Due to its pore-free surface structure, bacteria and germs cannot penetrate it.

Easy to clean

The surface is easy to clean thanks to its dirt resistant coating. To remove any residue simply use water and micro fibre cloth.

APPLICATIONS

The RAUVISIO surface range in use

A modern bathroom interior featuring a vanity unit with a white sink and a large mirror. The vanity unit has a dark metal frame and a light-colored cabinet. A large, light-colored rug is on the floor. A wooden bench is on the left. The walls are white, and the ceiling is white. The lighting is soft and modern.

THE GLASS FOR CARPENTERS

RAUVISIO crystal

The polymer glass laminate RAUVISIO crystal has revolutionised the market for glass applications. This innovative product fully offsets the disadvantages of real glass and combines its advantages with the positive features of thermoplastic laminates.

Range of options

RAUVISIO crystal is available in different versions (from page 21):

RAUVISIO crystal slim:

Thin polymer glass panel

RAUVISIO crystal magnetic:

Magnetic polymer glass panel

Cutting & drilling

Sawing, routing and drilling holes for fittings are no problem when working with RAUVISIO crystal. All you need to process these tasks are conventional woodworking tools, but without the risk of breakage or excessive waste.

Bending & free-form parts

This thermoplastic material can be formed into almost any shape. Even free-form parts are no problem for RAUVISIO crystal components.

Grooves & inlays

This surface material offers even more design flexibility. Include grooves or inlays in RAUVISIO crystal to add unique features.

Back lights

RAUVISIO crystal is easily processed offering greater design freedom. Grooves can be routed out to create back-lighting features – ideal for use at home or in the retail sector to create stand out pieces.

Highest quality

This surface material offers even more design flexibility. Include grooves or inlays to RAUVISIO crystal to add unique features.

Break and scratch-resistant

RAUVISIO crystal is the ideal solution for large - scale industrial production thanks to its durability. This, combined with its high scratch-resistance means up to 20% less waste when compared to real glass.

Easy to clean

RAUVISIO crystal is sealed with a HardCoat finish making it very easy to clean and ideal for applications that require high levels of hygiene.

Can be written on

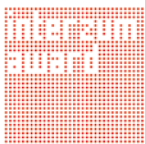

RAUVISIO crystal can be written on with regular board markers, which can be cleaned easily and without leaving any residue. Chalk can be used for matt surfaces.

Edging

Choose between two edgeband designs, both suited perfectly to RAUVISIO crystal. RAUKANTEX visions, the duo-design, uses its transparent leg to create the appearance of a sophisticated glass pane. RAUKANTEX colour uses a 45° chamfer to create this look. Both are available in zero-joint technology.

THE THIN POLYMER GLASS PANEL

4 mm polymer glass panel

is particularly suited for renovating ceramic tiles

100% flexible

for individual on-site pre-cutting

For those who would like the glass look of RAUVISIO crystal in niches, as wall cladding, front infills and similar areas of application, REHAU has developed the extra thin version RAUVISIO crystal slim.

RAUVISIO crystal slim is a 4 mm panel made of polymer glass laminate directly pressed with a matching colour balancing sheet. It has exactly the same processing properties as RAUVISIO crystal. It is particularly suited for renovating ceramic tiles, even in wet areas.

Unlimited processing options

Unlike real glass, RAUVISIO crystal slim enables flexible on-site fabrication. Recesses for electrical fittings such as sockets can be precisely measured and cut out, eliminating the need for templating.

Elegant laminate construction

The sleek low profile construction of RAUVISIO crystal slim enables a wide variety of sophisticated applications including kitchen splash backs, wall cladding and front panels.

Design awards

MAGNETIC GLASS PANEL

Magnetic function

upon request for all decorative colours

Residue-free cleaning

thanks to Hardcoat finish

Frameless application

for a sleek design

RAUVISIO crystal magnetic is a magnetic polymer glass panel that can be used for a diverse array of applications. Whether as a magnetic splash back in the kitchen or a frameless whiteboard in an office – RAUVISIO crystal magnetic opens up numerous design possibilities.

The magnetic functionality is provided by a thin steel inlay. This does not alter the surface properties of RAUVISIO crystal at all, maintaining the REHAU added value you're used to.

Can be written on

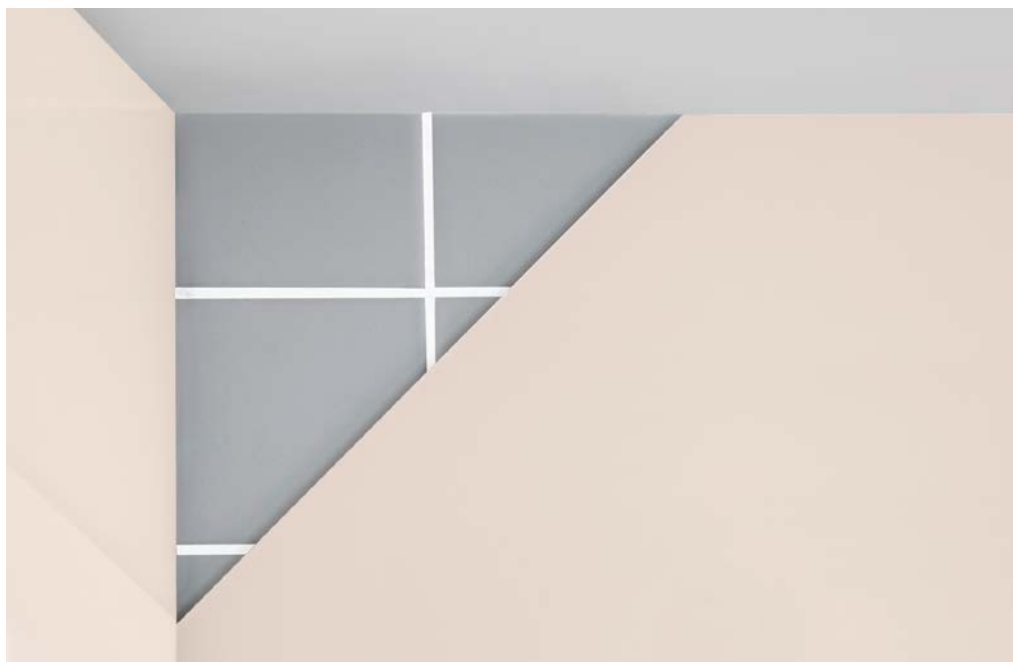

RAUVISIO crystal can be written on with regular whiteboard markers.

Chalk can be used on matt surfaces.

Use of neodymium magnets required.

RENOVATIONS MADE EASY

RAUVISIO crystal slim makes renovation, new build or modernising a project easy. The crystal panels can be mounted straight onto the bare surface in just a few simple steps, with fewer visible seams, making renovation work twice as fast.

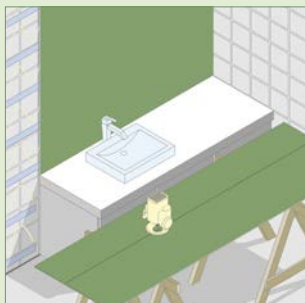

In contrast to real glass, RAUVISIO crystal slim offers flexibility in on-site installation. This means that recesses for electrical fittings such as power sockets can be precisely measured and cut out on site.

Menta

stark, light
fresh

Azzurro

cool,
spacious, open

Sabbia

reliable, stable,
easy to
maintain

Fumo

harmonious,
reserved,
serious

Behind every new colour collection there is a creative mind. With the expansion of the RAUVISIO crystal colour collection, well-known colour researcher, designer and colour artist Prof. Axel Venn in Berlin was involved right from the start.

REHAU's aim for the new crystal colour range quickly became apparent: the tones should be timeless and possess an eternal validity. The colours need to be suitable for a wide variety of settings, from private spaces such as bathrooms, kitchens and interior design through to projects in hotels and offices, and they must work equally well across national borders.

Professor Venn created a total of five colours that were initially presented to a large audience via online and face-to-face surveys. People were asked to sort all the colour tones by attractiveness and rate them individually. Over 2,400 participants were involved worldwide. The majority expressed a preference for the series based on the colours Corniola, Menta, Azzurro, Fumo and Sabbia.

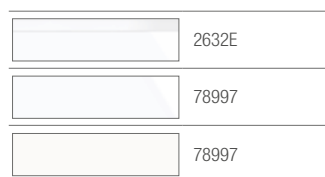

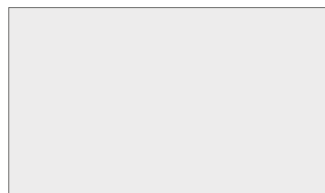

The five new colour tones for the glass laminate RAUVISIO crystal are distinguished by their timeless character, which is appropriate for private and commercial spheres. All colours can be combined with one another or with other tones and materials. They are available in matt and gloss.

BRILLIANT DESIGN WITH A SEAMLESS LOOK

RAUVISIO brilliant

RAUVISIO brilliant is the next generation high gloss laminate. By virtue of its tremendous depth effect, this product is the obvious replacement for costly high gloss painted solutions. A virtually invisible joint alludes to a cast product rather than a fabricated board.

Supported by nobilia kitchens

Cutting & drilling

RAUVISIO brilliant can be processed with common woodworking tools, and customised cuts, or drill holes for handles and fittings are possible.

Bending & trimming

RAUVISIO brilliant is ideally suited for simple bending and trimming. It can be used in nearly any form, providing design flexibility for more challenging furniture designs.

High gloss on the milling radius

Combining our 100% zero-joint edgeband with the new processing technologies in the market means that traditional frame effects are a thing of the past with RAUVISIO brilliant. This alludes to a cast product rather than a fabricated board.

Edging

As an edging specialist, REHAU offers edging profiles in a total of 6 design lines perfectly matched to the RAUVISIO range. All edgeband can be purchased in zero-joint quality from stock.

UV resistance

RAUVISIO brilliant has excellent light-fastness and UV resistance, which means no colour deviations caused by light and sun exposures in interior applications.

Highest quality

The finished RAUVISIO brilliant component is AMK-tested and TÜV-certified

STRUCTURES LIKE RIPPLES IN THE SAND

RAUVISIO wave

The structured laminate RAUVISIO wave features an impressive, unique wave-like surface. Material attributes can affect the way in which the light interacts with the surface, creating fascinating patterns, bringing the surface to life.

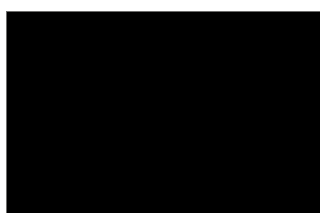

3D surface structure

The wave-like pattern of the surface is reminiscent of a deep-milled and lacquered MDF board. However, because the surface no longer needs to be processed manually, RAUVISIO wave saves considerable amounts of time and cost during production.
