## upgrade to **SOLID SURFACE**

CenturyStone™ solid surface finishes are offered in white, bone or biscuit to compliment any interior design scheme.

CenturyStone™ solid surface goes one step beyond and is offered in granite NATURALS seamless simulated solid surface finishes.

Solid surface shower bases are beautifully designed in CenturyStone™ solid surface, and are the perfect compliment for tile or marble.

**APPEAL** Renewable solid surface is easy to clean. Solid surface is seamless, durable and the non-porous surface resists stains and odors.

**ADVANTAGES** Praxis quality construction, traditional bath replacement sizes, shower bases available as left, right or center drain units, and a double entry base unit, barrier free and low threshold EasyStep™ bases available with No-Flex™ bottoms.

**EASY INSTALLATION** No mud set required with EasyBase™ factory reinforced, self-sustaining shower base - available on barrier free bases only.

**WARRANTY** CenturyStone™ solid surface bases offer a lifetime limited warranty.

*NOTE: Solid Surface upgrade is available for AcrylX™ bases only.*

## **CONTROL WATER SPILLAGE HELP PREVENT FALLS**

Preventing water spillage is a must. Safety is increased by retaining water in the shower areas to keep the rest of the area dry. Praxis offers the most effective forms of water retainment - the collapsible dam, semi-permanent dam and weighted shower curtains.

collapsible dam with vertical end caps

collapsible dam self-adhesive

collapsible dam flexes easily

semipermanent dam

premium weighted shower curtain

### **COLLAPSIBLE DAM with end caps**

Designed specifically for barrier-free, curbless showers and shower bases that require water control. When combined with a weighted shower curtain, the flexible collapsible dam prevents water spillage. The collapsible dam collapses easily by foot or wheelchair and returns to the original shape after it has been rolled or stepped on. The collapsible dam size is customized to your shower or base- you cut the strip to the length you need. Self-adhesive, double-sided, water resistant tape on the bottom ensures a secure seal. Praxis collapsible dams are certified bacteria resistant. End caps for showers and bases with radius or square end walls are available.

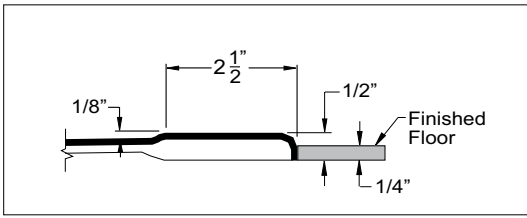

### **SEMIPERMANENT DAM**

Semipermanent dams are custom made to fit each shower base and are siliconed in place. The semipermanent dam allows for a low step entry into the shower and excellent water spillage protection. Since the dams are siliconed in place, dam can be removed and reused if necessary.

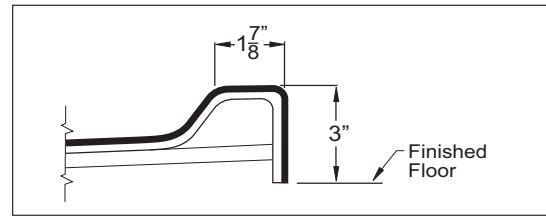

### **WEIGHTED SHOWER CURTAIN**

Premium weighted shower curtains are necessary for a complete water retainment system to work properly. Praxis offers heavy gauge institutional grade shower curtains that contain one inch heavy tape weights embedded in the bottom seam of the curtain. When combined with a collapsible dam or semipermanent dam, the weighted curtain will catch the top of the dam and the curtain will be prevented from blowing out over the dam. The curtains are sized 15% larger than the shower opening for effective containment.
